

Okay, FOX Kids, time to come out of hibernation! Spring is right around the corner. Cool! What better way to celebrate than with the latest issue of your very own ultra-happenin' *Totally Kids!* Inside are some new FOX friends. You've probably already heard of Carmen Sandiego, but now you'll see her on FOX with all-new mysteries. Also joining the lineup is a superhero like you've never seen before. Who is it? Find out on page 22. We've got lots more stuff inside, including a pull-out poster featuring your favorite Morphin friends.

Jeffrey Mallari Age 14 Pittsburg, CA

KTXL FOX 40 Kids Club I would put some of the things that kids today play with, like video games. I think that kids in the future will be amused with this because they would see the video technology we have now. Technology in the future would probably surpass all the video games we play with today. On a more serious note, I would also put a red ribbon to signify AIDS awareness and research. Hopefully it wouldn't be used anymore.

Phillip Lemaire Age 11 Deweyville, TX KVHP FOX 29 Kids Club

I would put a copy of Gone With the Wind in the capsule and attach a note to it saying "If you have a VCR watch this tape." I would do this to make them suffer like I did. I would also put a baseball card that is old so they can cash it in and give the money to the homeless.

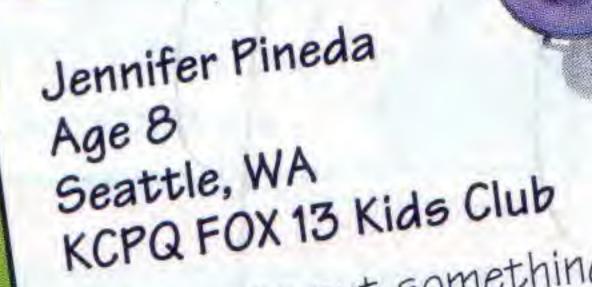

WE ASKED:

What would you put in a time capsule and why?

Lindy Law Age 12 Cornish, UT KSTU FOX 13 Kids Club

I would put a picture of where I live (out in the boonies) to see if the

population grows and see if a mall could ever be built closer to my house!

If I were to put something in a time capsule for kids to open 50 years from now I would put a jar of air so people could smell the past. Also I would put a comic book so the people could see what kind of comic book was made then.

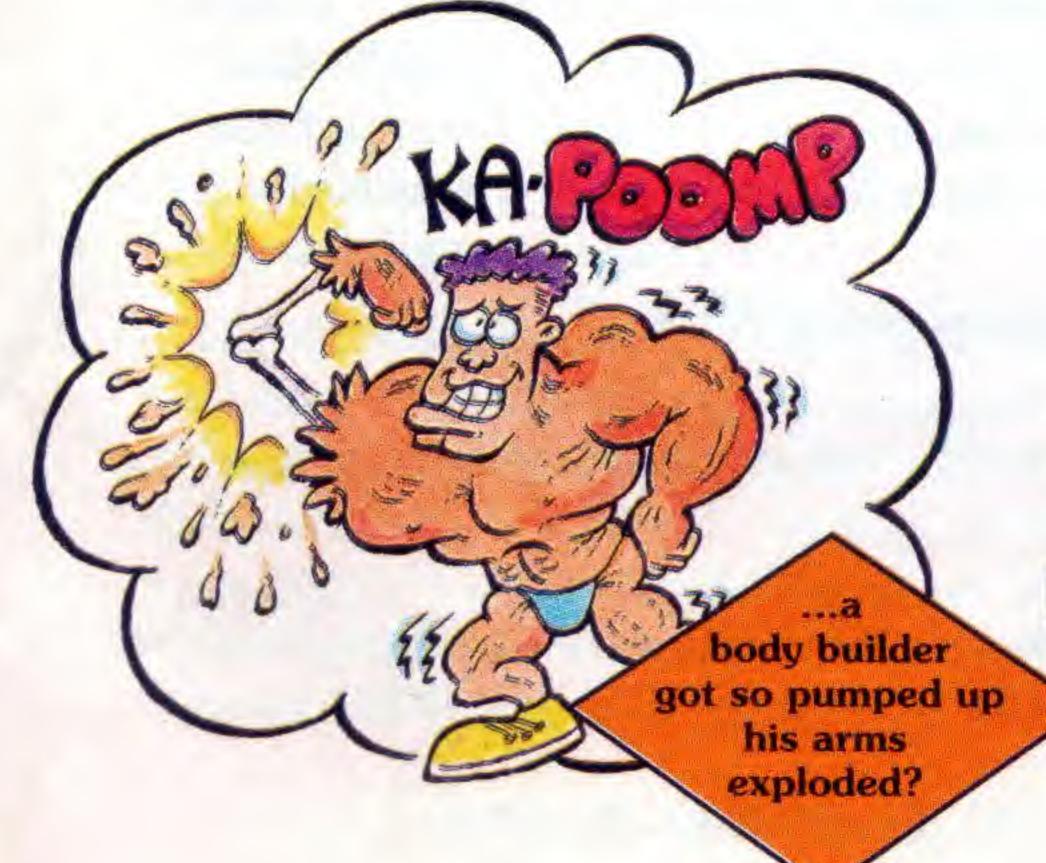

> April Anders Age 13 Edwards, MS WDBD FOX 40 Kids Club

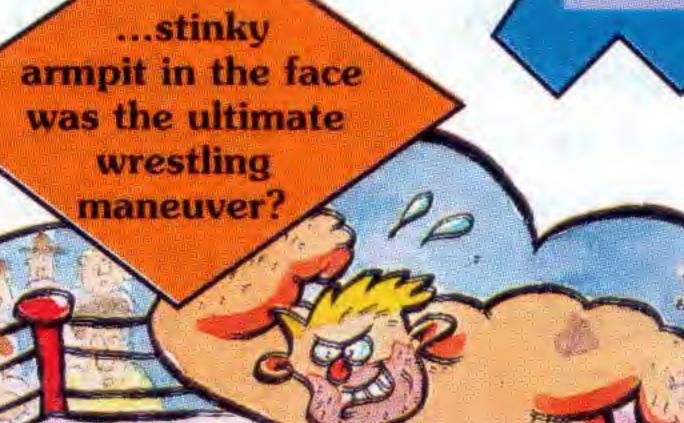

If I could put anything I wanted in a time capsule, and kids would open it in 50 years, it would have to be my little brother. But when they open it, they'll probably try to send him back! (I wouldn't blame them!)

If you could live anywhere else, where would it be and why?

Send your answers to KIDS TALK, PO Box 7771, Burbank, CA 91505. Be sure to include your name, age, address and FOX Kids Club station. All letters become the property of TOTALLY KIDS and may be published in a future issue.

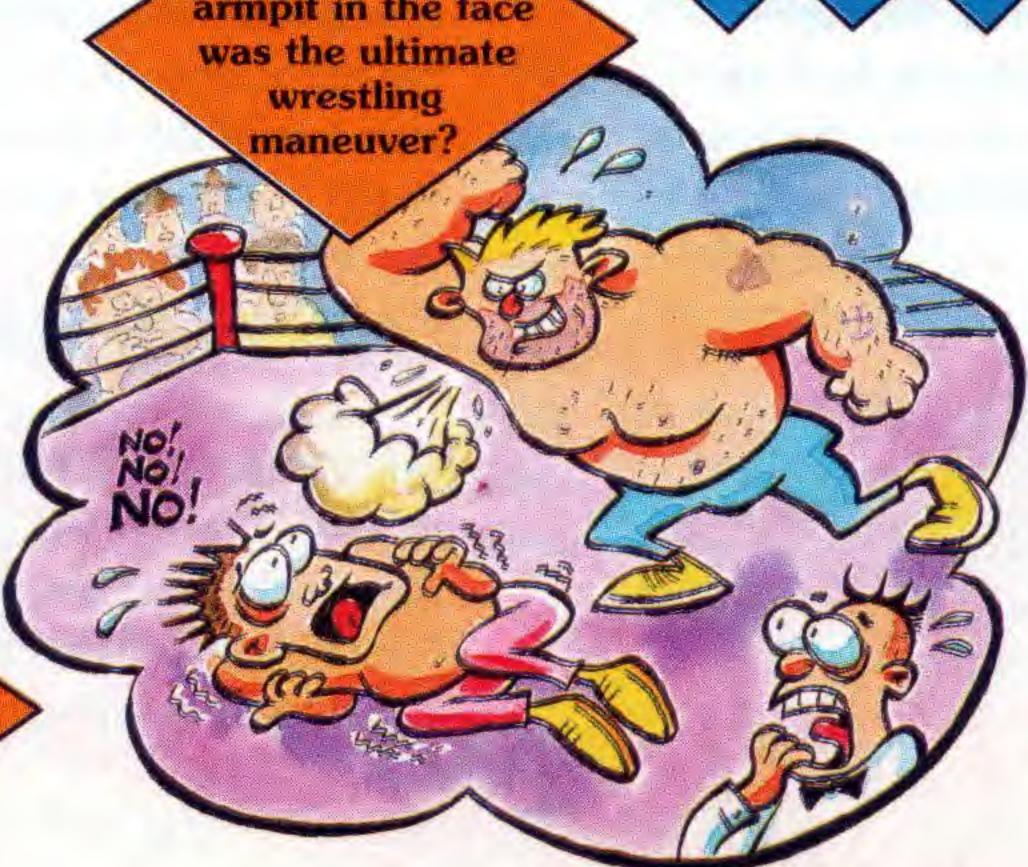

Latch Eek! The Cat yourself every Saturday morning on FOX.

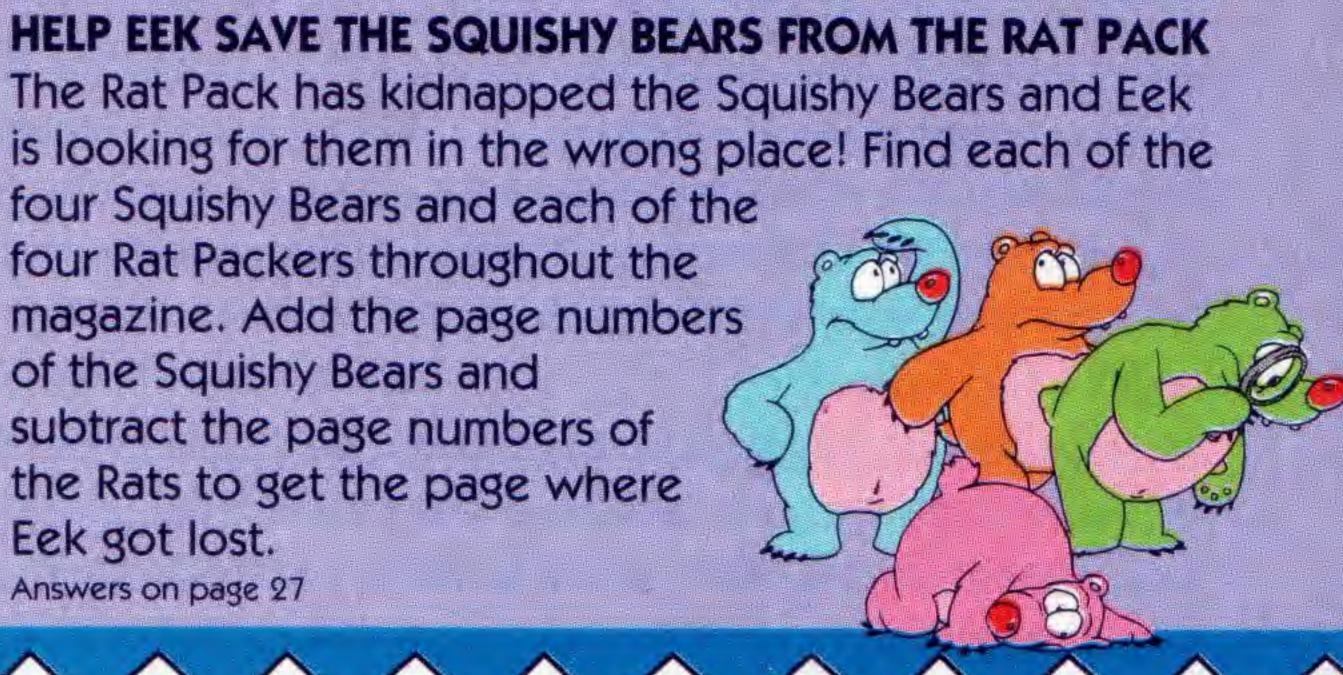

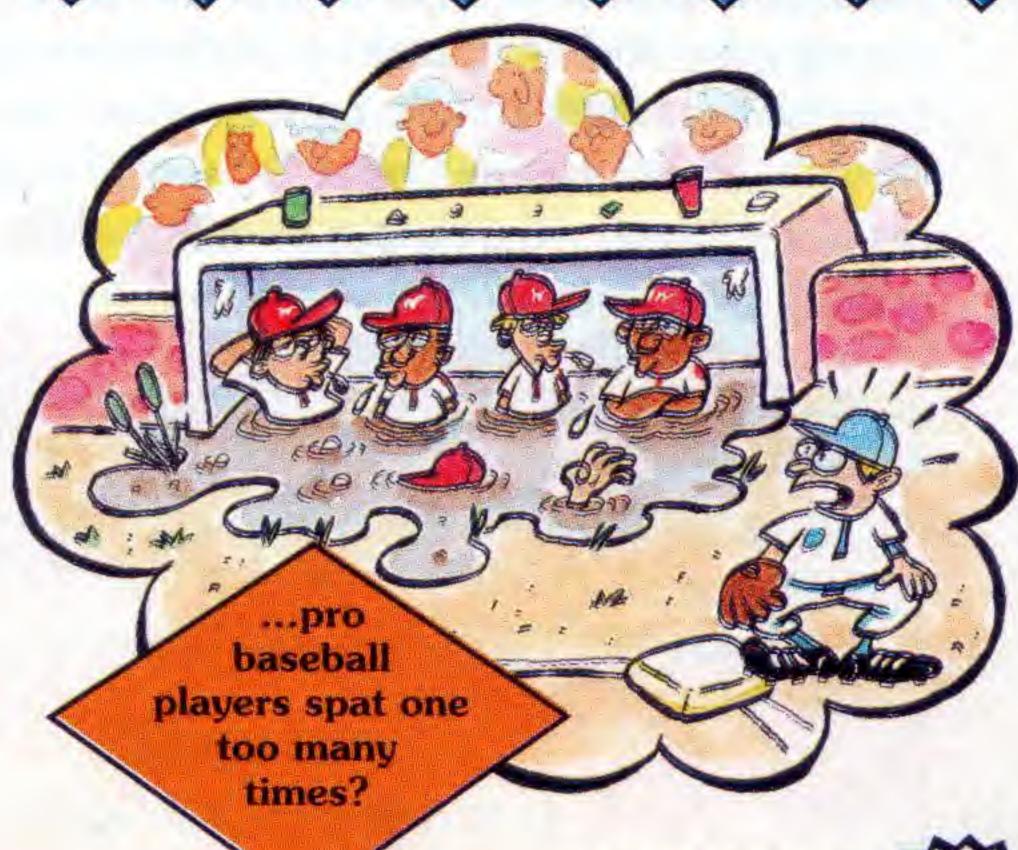

Eek got lost.

Answers on page 27

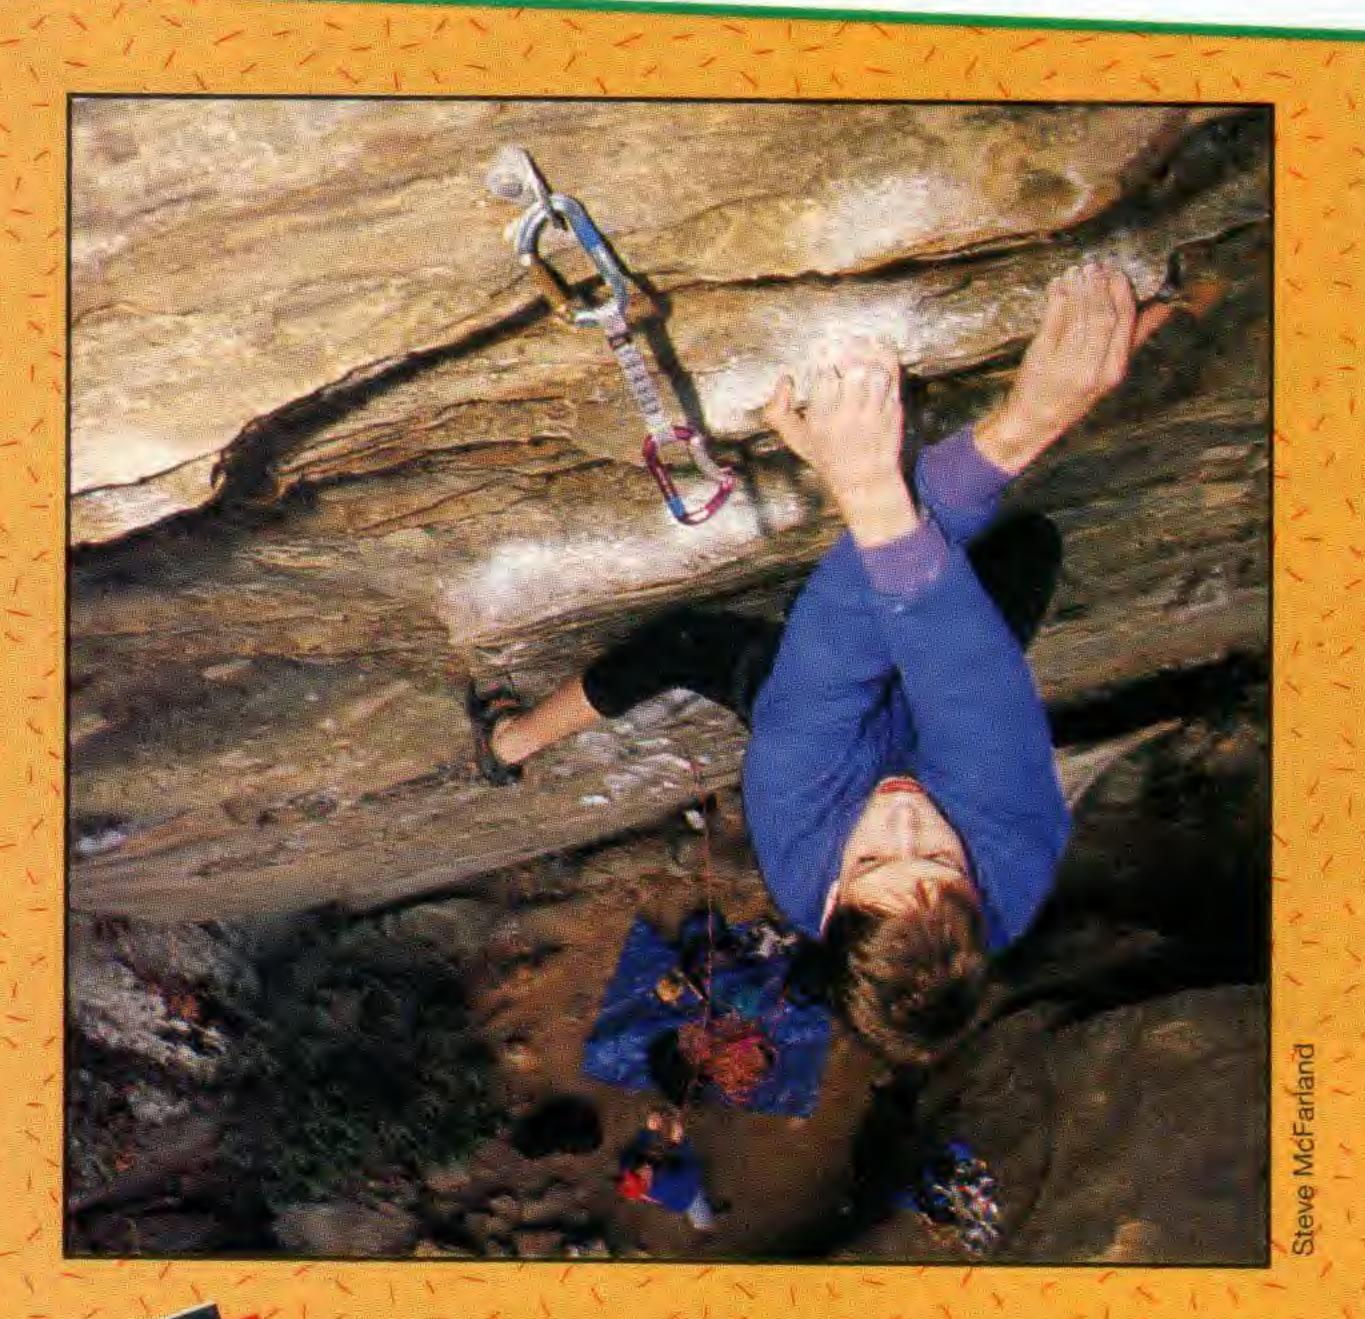

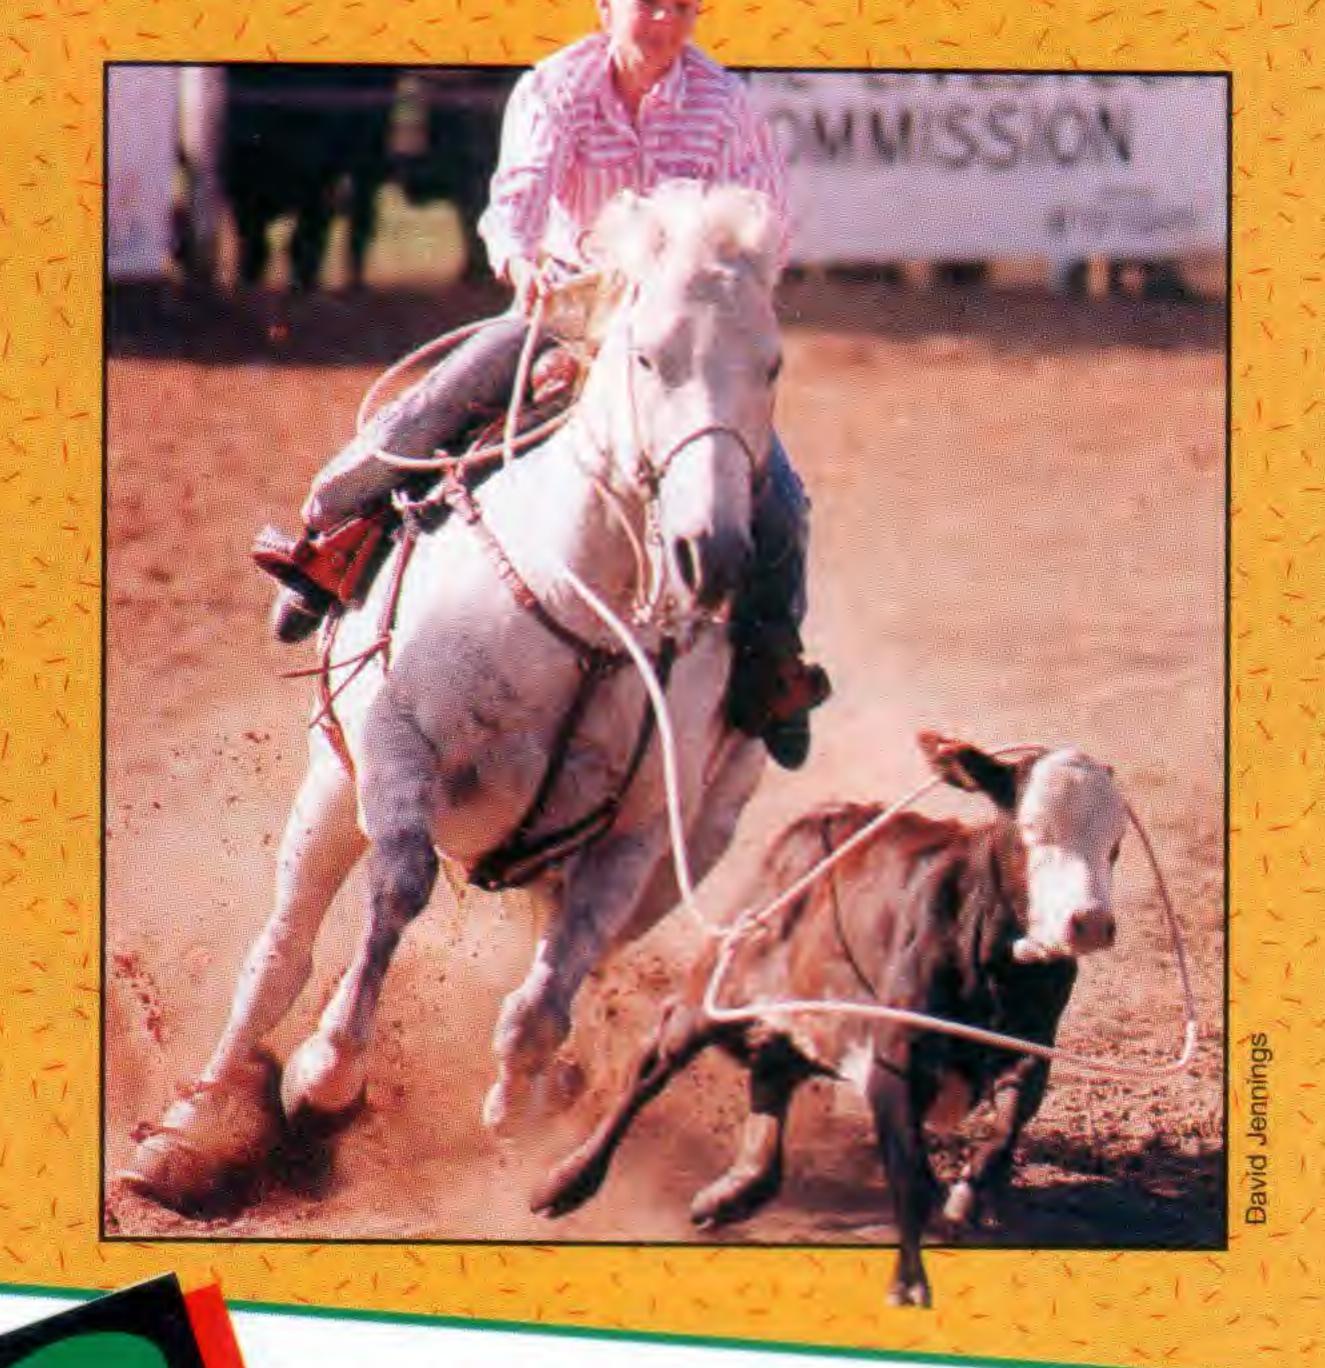

ey, kids! It's me, Robin—the original "boy wonder." Look, it's really cool hangin' with Batman and acing the bad guys. But you don't have to dodge bullets or jump off buildings for excitement. Just check out these kids in sports so extreme, you'll scream!

OCK CLIMBING

David Hume, age 12 Lexington, Kentucky

Here's a real life kid-cliffhanger. David climbs at a level of difficulty that most adult climbers can't handle. He uses ledges and cracks in the rock, sometimes no wider than a nickel, to claw his way to the top of very steep rocks, using ropes and harnesses to catch him if he falls. Have you ever looked out the window of a tall building and wondered what it's like hanging on the outside? Well, this is what rock climbing felt like to David on his family vacation trip to the West.

"One of my coolest experiences as a climber was when I climbed Devil's Tower in Wyoming when I was nine. Devil's Tower is an amazing spire of rock, about 1,200 feet high, which shoots out toward the sky from a totally flat prairie. A bunch of cracks split its surface and lead to its flat top. Among these is a route named the Durrance Route which my family and I climbed to the top. It's about 600 feet of climbing divided into six sections called pitches. The climbing on the Durrance Route is not too tough, but the exposure and height made it pretty scary."

Route-Like a trail that climbers use to get to the top of a rock. It usually has a name.

Pitch-As far as you can climb on a length of rope, anywhere from 80 to 150 feet.

Exposure—The sensation of feeling a long way from the ground.

How to Rock Climb by John Long

Janae Ward, age 11 Addington, Oklahoma

ODEO

Ride 'em, cowgirl! Janae is ranked fifteenth in the world in barrel racing-against adults! She competes in pole bending, goat tying and calf roping, too. These are just a few of the events that make up rodeo, kind of like the Cowboy Olympics. They wrestle bulls and ride bucking broncos just like in the old westerns! Janae and her horse, Blooper, ride, rope and collect belt buckles. (They're rodeo trophies; she's won 76 of them!) Yippe kai-ai-aye, little dogies!

"The biggest rodeo I have ever ridden in was at Sallisaw, Oklahoma. There were some tough barrel racers up the same night I was, and some really fast runs the two nights before. I think my horse could tell I was nervous. He is 13 years old and has been to many barrel races. He took off at the very back of the alley and I thought he was going too fast to turn the first barrel. I pulled on my reins when it was time to turn, and he turned really close. It was one of the fastest runs we had ever made. The crowd was really cheering. I won this rodeo, which made it possible for me to try for the International Finals Rodeo. I like doing all the rodeo events, but I like the barrel racing the best."

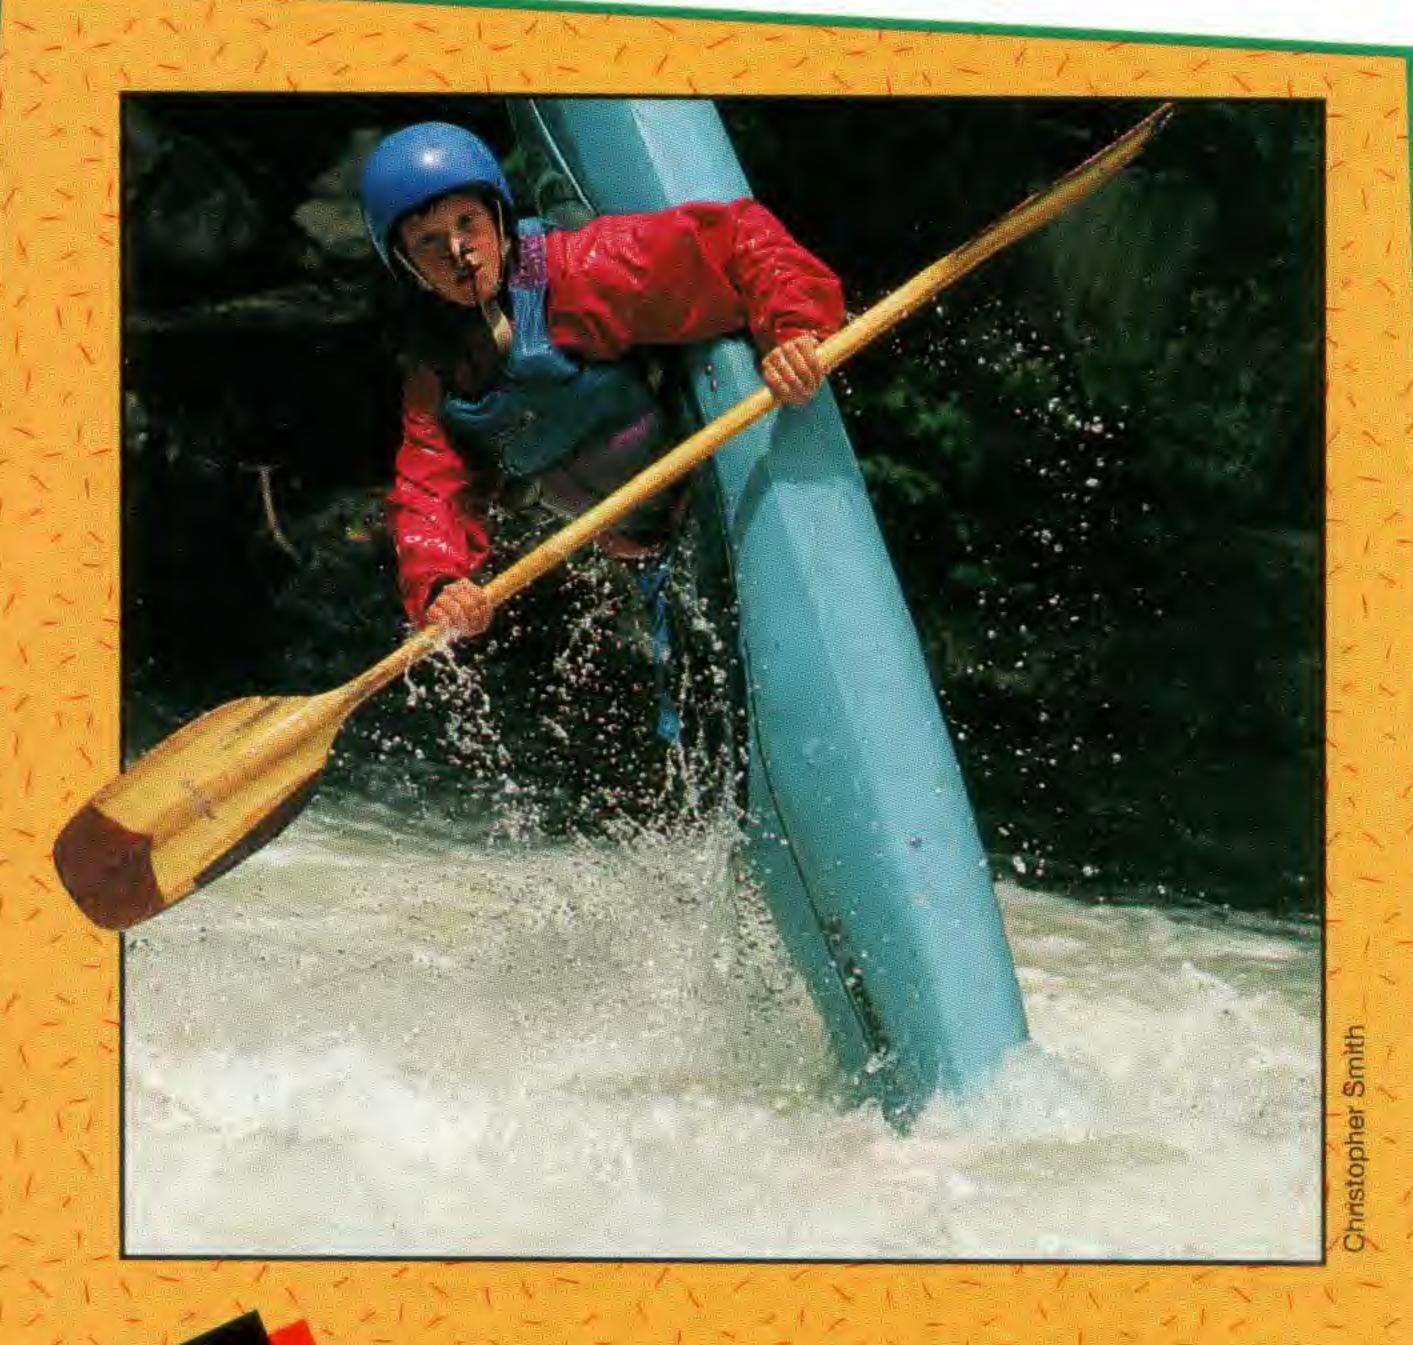

Barrel Racing-Riding a horse through a slalom of barrels for speed. Run-One event or race.

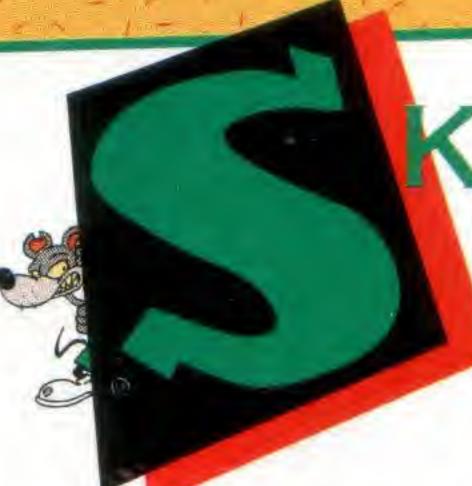

Alley-The path from the gates to the front barrels. International Finals Rodeo-At the end of each year, the top 15 riders in the world qualify for this "world series" of rodeo in Oklahoma City.

SESSION OF STREET OF STREE

KATEBOARDING:

Holly Bennett, age 9 Pacifica, California

Skateboards weren't always for thrashers. They were invented by surfers in the sixties, when they couldn't get to the beach. Now, people all over use them to do tricks like flips and jumps. Holly has tons of experience shredding on her deck. But going head over heels 12 feet in the air and landing on a piece of wood on wheels can get pretty scary. Of course, Holly always wears a helmet, knee pads and elbow pads when skateboarding, so she can really go for it.

"The hardest trick I've ever done is a railslide on an eight-foothigh vertical ramp. I can do 50/50s, and fakey rocks, too, which are very difficult. I took a really hard face fall on a ramp when I was six years old and knocked my tooth out. It hurt a lot. I can beat some older kids skating on a ramp, but I don't weigh enough yet to catch air. I've started surfing, too. Surfing is like skateboarding on the water."

Deck—Skateboard (about 2 feet long, 6 inches wide, with four wheels).
Railslide—Sliding the bottom of the skateboard along the top pipe of the ramp, and then dropping back down into the ramp.
Ramp—Curved like a giant "U." Skateboarders ride back and forth, doing tricks at each end. Some skaters use empty swimming pools.
50/50, Fakey Rock—Ramp tricks in different directions using other parts of the skateboard.

CHECK IT OUT: Better Skateboarding for Boys & Girls by Ross Robert Olney

Andrew Holcomb, age 12 Bryson City, North Carolina

It's wet, wild and really dangerous. Shooting the rapids upside down underwater using his paddle to avoid jagged rocks and strong whirl-pools is Andrew's idea of a fun day on the river. He uses a kayak—a boat that you wear which is sealed so that almost no water can get in. Kayaking is rated for difficulty in classes one to six—one being moving water, and six meaning "Don't try this at home!" Andrew dares to go where even fish won't swim, speeding down a river where the slightest mistake could mean disaster.

"The hardest rapid I have ever done is probably the Iron Ring, a rapid on the Upper Gauley in West Virginia. I ran the Iron Ring last spring. It was very intimidating because the Iron Ring is a class six, which is as hard as it gets. If you are just 12 inches off your line you are in trouble. As I approached the top of the rapid there were two holes I went just to the right of, then into about a ten-foot steep slide with a rooster tail wave at the bottom. I had to be right on top of the rooster tail to fit through the slot between the sharp jagged rocks on the right and the ugly monster hole on the left. I cinched the rapid. In other words, it was a beautiful run."

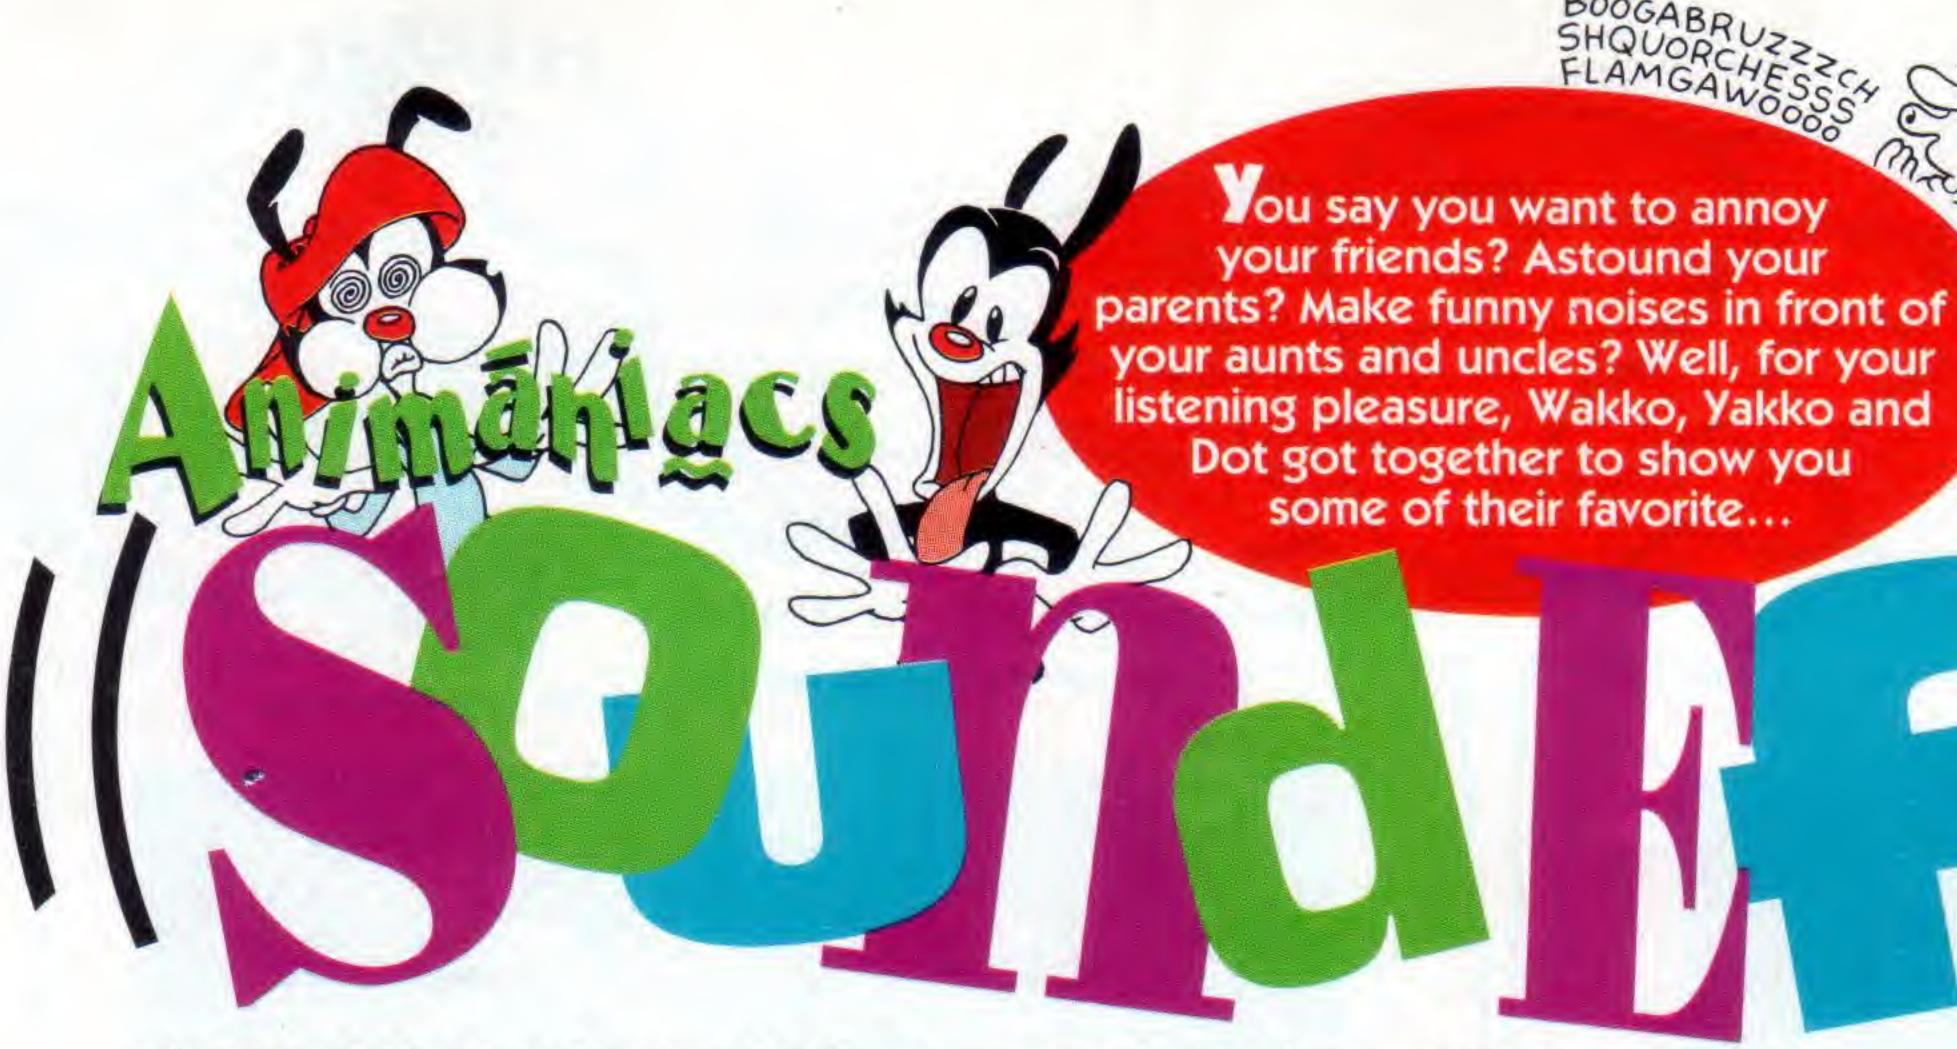

Ran/Run-Kayaking down the river.

Line—The path of travel to get past obstacles in the water.

Hole—A place in the rapids where the water goes backwards; it is very dangerous because you can get stuck there.

Rooster Tail—A wave that curls upstream and sprays up like a rooster's tail.

CHECK IT OUT: Kayaking by Alan Fox

Some of the best sound effects around are those you can make with your hands and your mouth. Check out these nutty noises that the Animaniacs like to think they invented.

BUBBLE BABBLE

Talking underwater without getting wet! Just put
your index finger between
your lips and wiggle it up
and down while you talk.
(Blub-blub.) The next time
you want to get off the
phone say, "I can't talk right
now, the bathtub is overflowing." Cool, huh?

CHOPPER TALK

Okay, slap your chest with both hands, one after the other, quickly, over and over. It should sound something like helicopter blades. Now talk. (Ratta-tattaa.) When you're sitting in the back seat of the car, say, "Dad, I think there's a helicopter behind us." Now start slapping... "Mr. Smith, please pull over..."

THE BIG SNEEZE

When done correctly, your average raspberry splat sound can be quite an effective sneeze. Just put your tongue between your lips and make the splat sound short and forceful. Now cover your mouth and nose with your hands or a handkerchief and let go!

(Ppbltttbht!!)

MASTERMOUTH THEATER PRESENTS...

A whale of a tale that you can tape, or simply use as material at your next Hollywood audition. Use the sounds you learned above, but remember, use a clean index finger—or borrow a dentist's finger.

(Mouthsound #1: Index finger in place. Okay, now wiggle.)

#1: Help! Yakko here! Can't come to the phone right now on account of I've just been swallowed by a giant whale. Hey, I'm all for saving whales, but right now I wish someone would save me! Wait, is that a helicopter I hear?

(Mouthsound #2: Wakko speaks over thud-thud-thudding of blades.)

- #2: Pinocchio, is that you?
- #1: Do I look like firewood to you, Wakko? Now get me outta here!
- #2: Open up and let the kid out. C'mon, Monstro... it's drafty out here.
- #1: It's not exactly a bellyful of laughs in here either. I'm wet, I'm tired, I'm hungry...and I'm not in the mood for sushi!
- #2: Keep your pants on! One giant pepper sprinkle coming up! This oughta wake up old blubber-head.

(Mouthsound #3: Okay, make it a big one—whale-sized!)

- #3: Ah...Aahh...SPLAT!
- #1: Great, I'm free! But I think the big guy's really angry. He's looking at me and seeing food. Get it? See-food!
- #2: Don't worry, I thought of everything. I'll just drop him this can of green peas.
 That should tide him over until you wave goodbye.
- #1: Gee, another whale rescue by GREEN PEAS!

Watch, taste AND listen to the Animaniacs, weekday afternoons on FOX!

Check out these other strange noises that you can make with stuff from around the house. They're great for accenting a story, or embarrassing your brother or sister.

NERPLOP SPLAT

Put a straw into a dish of pudding and blow. It's great when your friend sits down at the lunch table—just don't let anybody see you do it.

ARROW SPROING/QUICK STOP

Hold the end of a plastic spoon or ruler against a sturdy table top. With your free hand gently twang the other end. Change the pitch by sliding the spoon or ruler up and down.

DISGUSTING CHEWING NOISE

Gently crumple an empty potato chip bag or paper. Make gulping noises with your throat. Maybe say "How long have these cheese puffs been sitting here?"

SICKENING SQUISH POP

Wet the rim of a styrofoam cup and place it upside down on a smooth table top. Now push down on the cup until it's squashed flat. You just stepped on one huge bug!

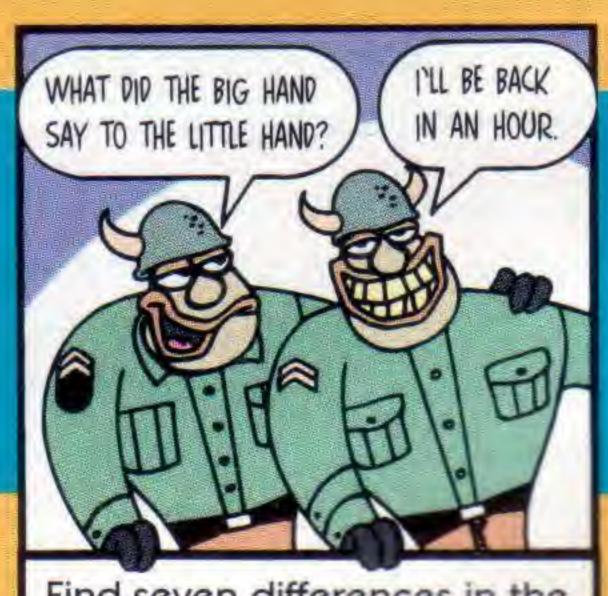

WEIRD "DOYNG" SOUND

Fill a steel bowl or pan halfway with water and jiggle it. Now tap the side of the bowl with a spoon. Do it when your parents are in the next room and say, "I'll get it. It's my intergalactic communicator!... Hello, Zorkon? Yeah, it's me...."

Banging on pots and pans, bicycle horns and all sorts of other things make great sounds, too! Listen to sounds around you and experiment to find other great ways to sound off. Who knows? You may become the next Animaniacs sound effects expert!

THE MISSING 'GATOR OF GUMBO LIMBO

Jean Craighead George

Reported by Charlotte Knowlton Age 11, Medina, OH WOIO, FOX 19

THE MISSING 'GATOR OF GUMBO LIMBO is an exciting book about nature and friendship. Lisa K. is a "homeless" girl who lives in Gumbo Limbo Hammock in the Florida Everglades with Dajun, a 12-foot alligator. Everything is threatened when an official comes to the hammock with orders to kill Dajun. My favorite parts were when Lisa K. found Dajun, and when I learned that alligators can stay underwater for five hours. I recommend this book; it is full of suspense and adventure. THE MISSING 'GATOR OF GUMBO LIMBO

is the story of a girl's love for a 'gator, an everglade hammock and the peace she found there.

WOIO, FOX 19

Kelsey Knowlton

Koch

WORLD WATER WATCH is about endangered animals that live near or in the water. Michelle Koch tells about animals that we need to help because they are dying. People hunt, cause oil spills and wreck their environment. I think this book will help people learn how to take better care of the Earth, her animals and her waters. I especially like Michelle Koch's drawings. I even copied some. If you enjoy animals as much as I do, I think you will like this book. Published by

Greenwillow

What if we kids had our own contest to draw pictures about protecting the Earth...you know, clean air, endangered species, reduce—reuse—recycle?...

And what if the four kids who won this contest each washington, D.C., and received \$3,000, a free trip to Washington, U.S. received \$3,000, a free trip to washington U.S. had their designs printed up on 50 million U.S. postage stamps?

HEY, IT COULD HAPPEN!

THE FUTURE !

File Edit Whip Mix Blend Liquefy

While working on the X-Men's super-computer main frame, Jubilee came across this file of predictions made in the first half of the 20th century about life in the 1990s. Help her "save" the predictions that have come true and "delete" the one that is totally off base.

Old Predictions

1933: In his story The Man Who Awoke, science fiction writer Laurence Manning predicts worldwide gasoline shortages and entire forests being cut down.

1939: Sci-fi writer Isaac Asimov, in a story titled Trends, writes of the first manned flight to the moon.

1939: The New York World's Fair displays a City of Tomorrow, which predicts freeways connecting every U.S. city.

1943: The magazine *Scientific American* publishes an article about how cars will have wings by the 1990s.

1945: Arthur C. Clarke, author of 2001: A Space Odyssey, predicts the use of satellites to beam television and radio signals to places all over the world in his essay Extra-Terrestrial Relays.

Delete

Save Delete

Save

Save

With Beast's help, Jubilee has decided to enter a list of predictions made today about what life will be like 50 years from now. Decide if they should save or delete these entries based on whether you think they will come true.

1. In his novel Neuromancer, William Gibson predicts that cyberspace will let you "virtually" travel anywhere in the world without leaving your room by plugging your brain into a large computer network. [Being sent to your room was never this much fun!]

2. Alvin Toffler, author of *The Third Wave*, recently predicted that North America (U.S., Canada and Mexico) will split up and form several new smaller countries. (Who gets to keep the Liberty Bell?)

3. In The Merchants' War, C. M. Kornbluth predicts that junk food will be good for you, and school lunches will contain candy and ice cream. (No dessert until you finish your cheese puffs!)

A. In The Hitchhiker's Guide to the Galaxy, Douglas Adams predicts that plastic surgery fads will change frequently as people attach extra limbs, noses and even animal parts to their bodies. (Eat, drink and play video games all at the same time with your three arms!)

5. By looking at the history of inflation, Beast has calculated that the average price the tooth fairy will leave for a tooth under the pillow will be \$5,000. (But that will still be pocket change

when a comic book costs a million!)

Save Delete

Save Delete

Save Delete

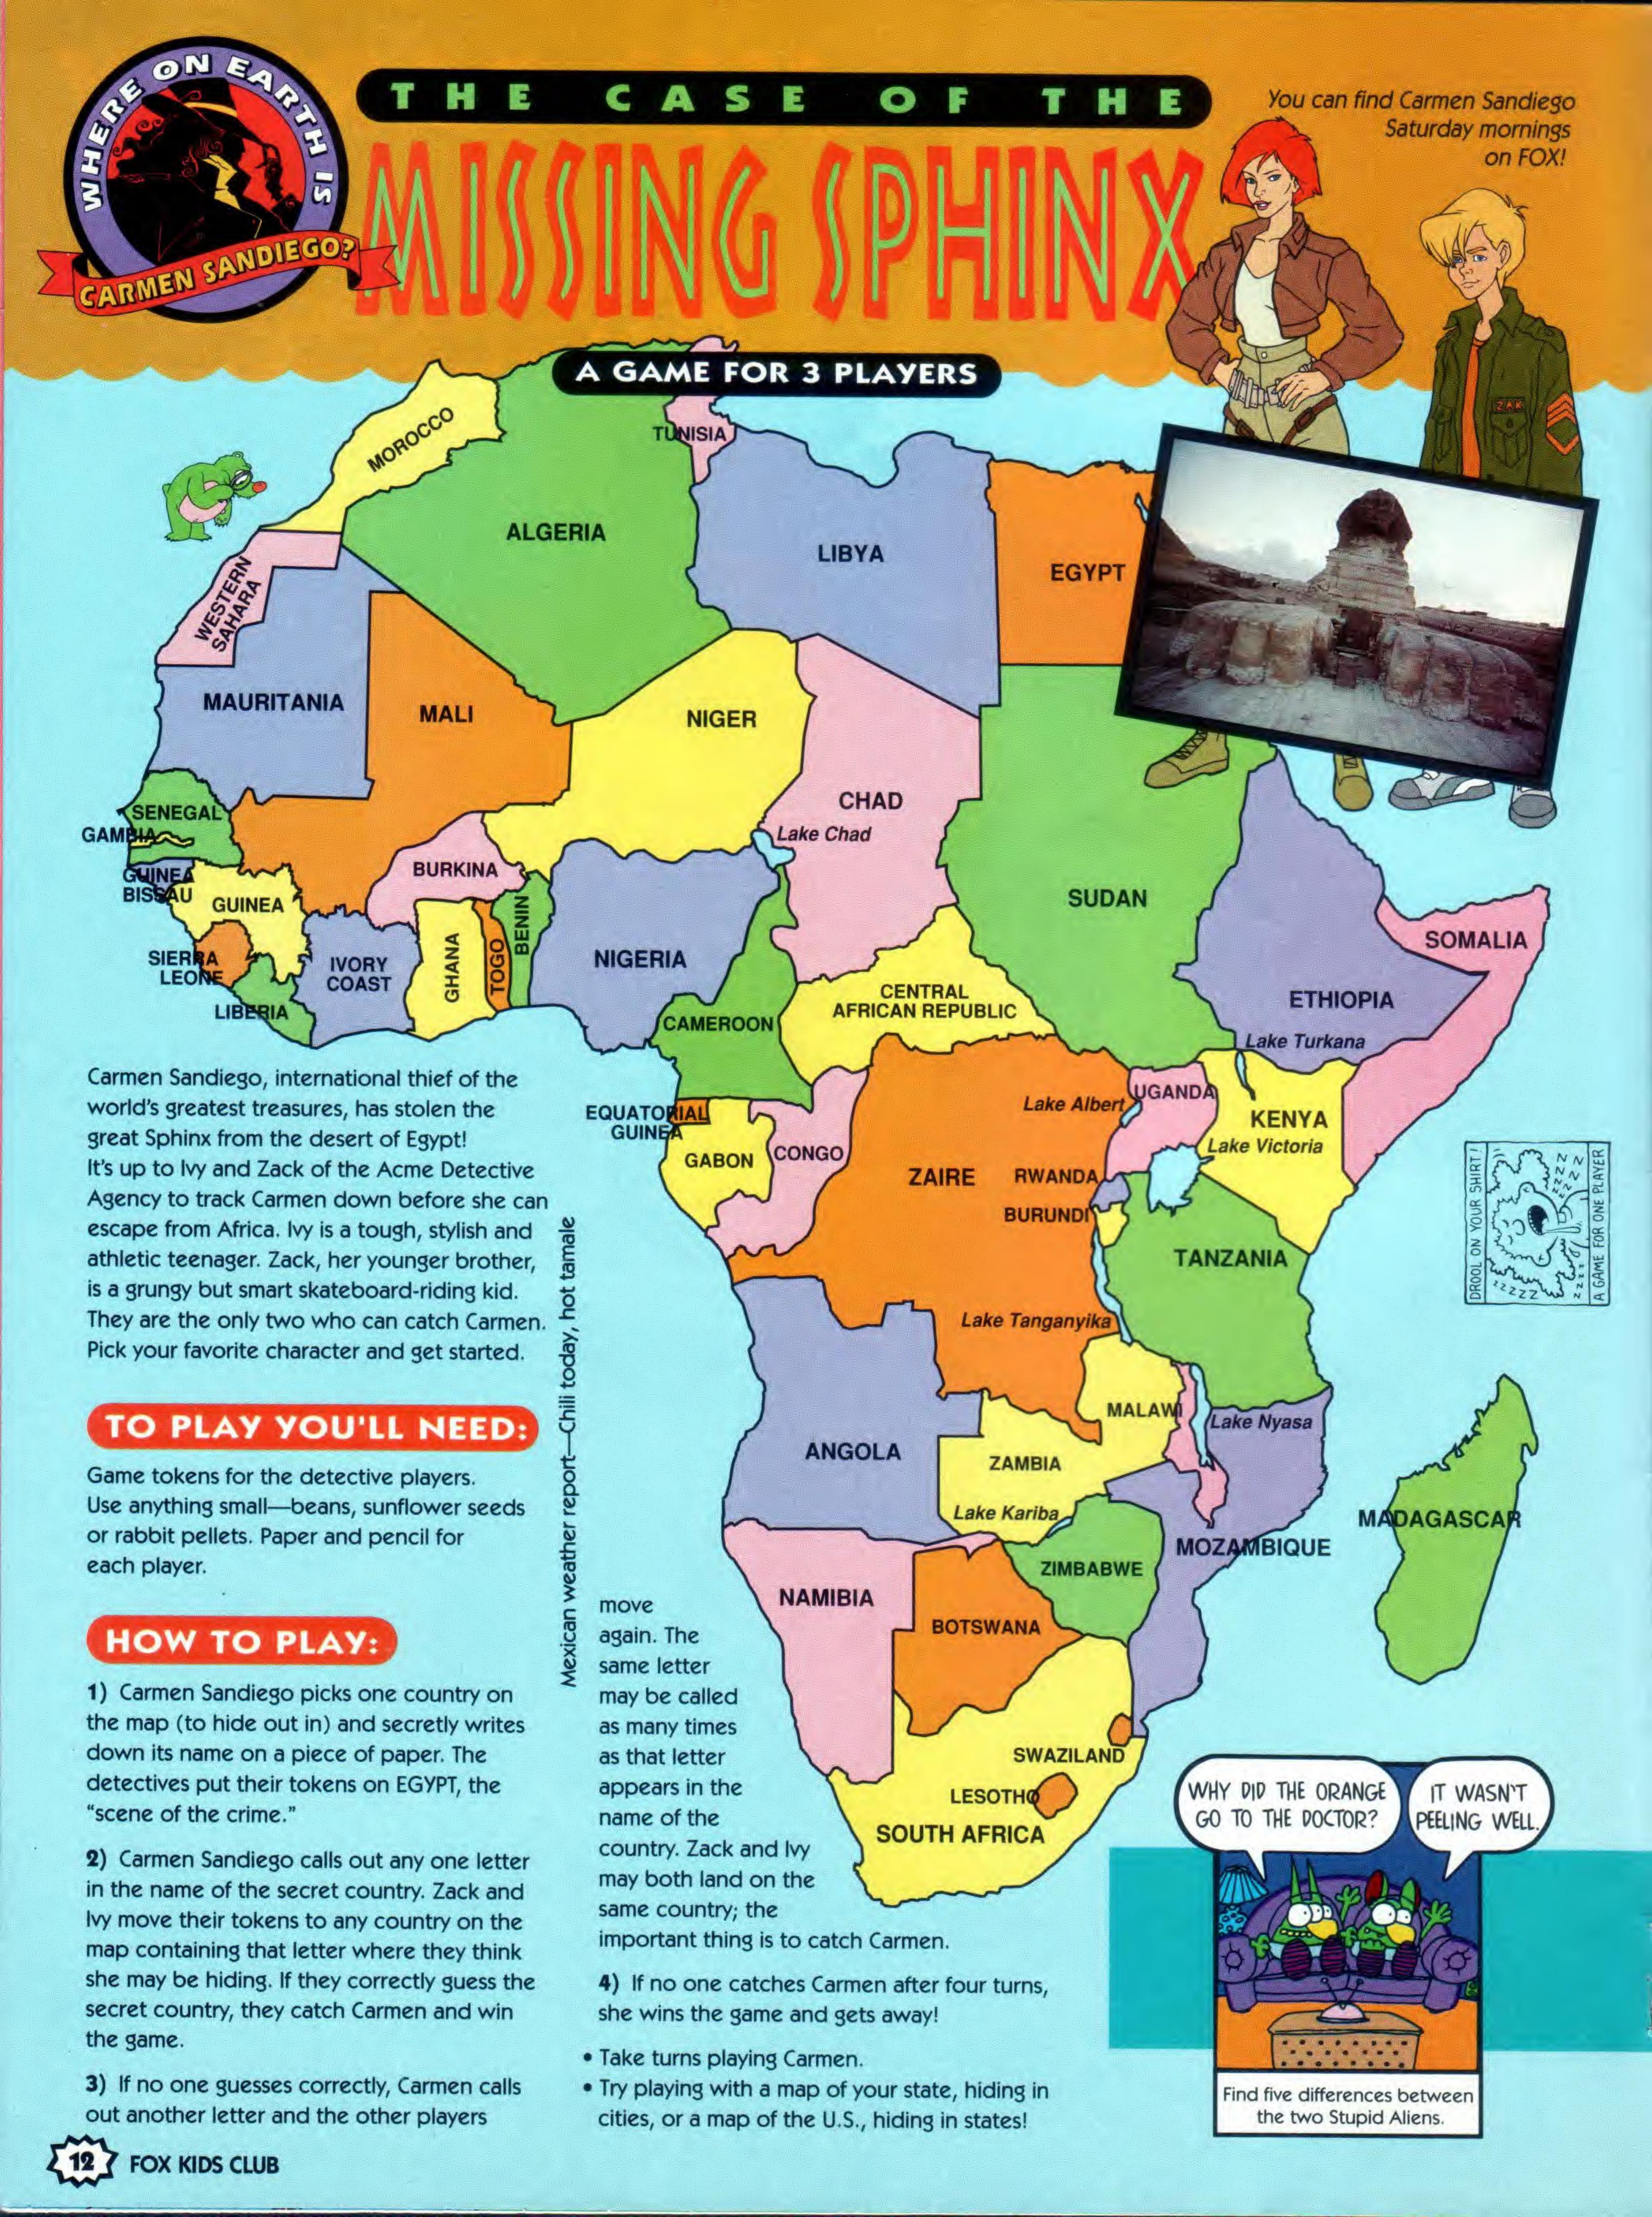

Save Delete

Save Delete

We predict you'll watch the X-Men Saturdays on FOX!

This concludes Jubilee's super-computer system status report. You should write down your own list of predictions and save them along with this magazine for 50 years to see which predictions come true. What will the world be like when you're 60 years old?

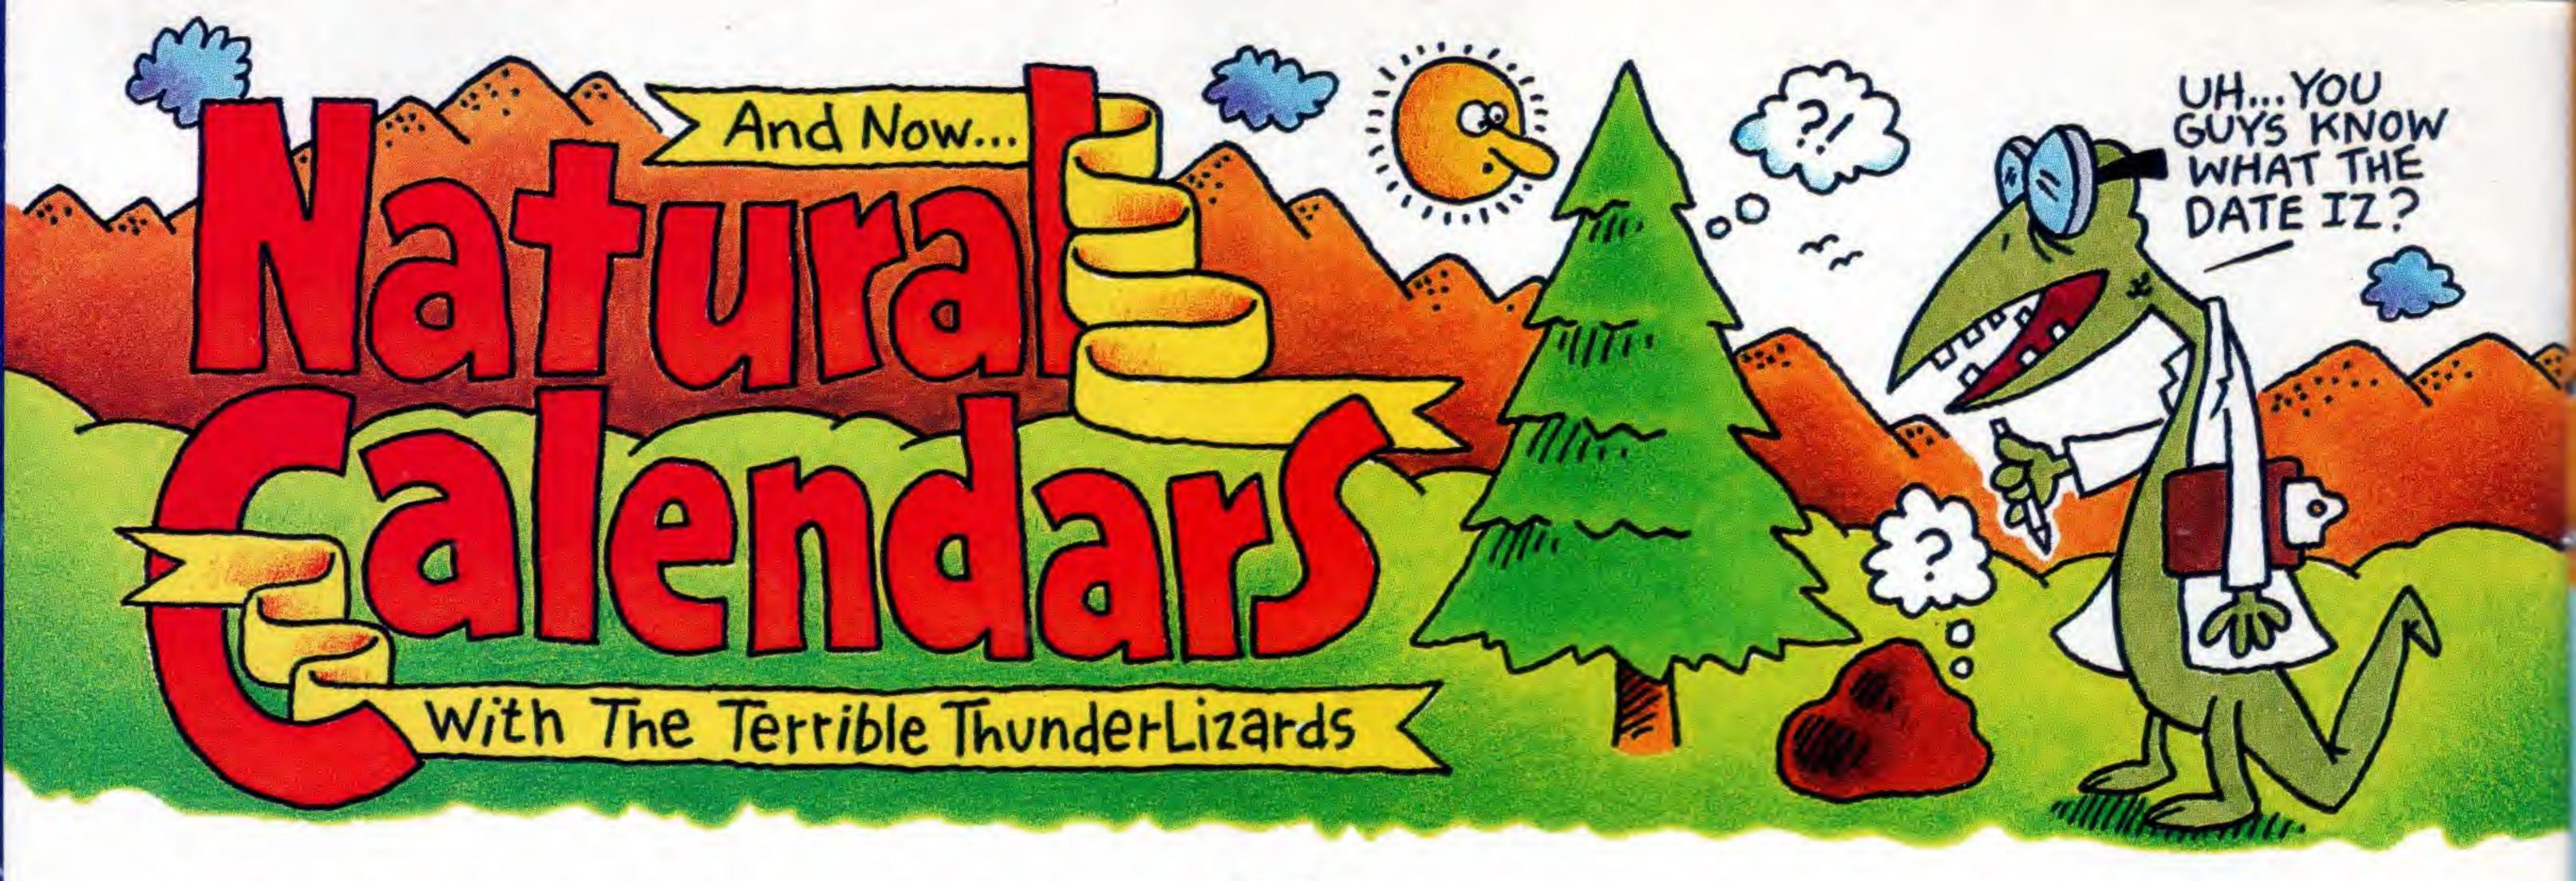

B B M Barbie Get ner ready for bed, "Brush" her teeth Close her eyes doll with a new soft body made of fabric. She's so cildily soft you can snuggle up and sleep with her. To close eyes and mouth, use warm water (not hot) on washcloth and toothbrush. To open eyes and mouth, use cold water on washcloth and toothbrush. Not for use with some Barbie ' fashions. 1993 Mattel Inc

All right, FOX Earth Crew Members, it's time to come clean. Whether you know it or not, you've been leaving a trail behind you as big as the Terrible ThunderLizards'. Ever raid the fridge like a starving caveman and discover some bizarre mutant life form growing in there? Just how old is that stuff?

That's what some scientists work hard to figure out. They study things like the growth rings in trees and the layers in rocks, glaciers and icecaps for clues about our past, which help them figure out why the ice ages happened, why the ThunderLizards disappeared, and where all those lost pencils go.

rer notice how your bathtub has - a ring for every bath you've taken? Did you know that trees have rings for every year they were alive? You can count the rings to see how old a tree was. If you look closely, some rings are thicker because it rained a lot that year.

cientists sometimes take a massive drill and poke down through the layers of ice and snow and other junk in a glacier. They pull up this plug of ice and dirt all piled up in strips like a weird kind of super ice-cream sundae. By looking at all these layers they can tell how pollution, volcanic ash and things like that affected the weather and the climate.

Other scientists look in rock layers for clues. These layers of stone, sand and junk have all been crushed down together over millions of years. Once in a while they find fossils and bones of ThunderLizards and other things, like those petrified globs of gum stuck under your desk. Nobody ever said science was pretty.

ThunderLizards

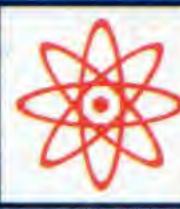

Saturday Mornings

They're a blast!

ut will we learn enough from all this poking around to keep from doing dumb things to Dourselves like trashing the planet and pouring toxic gunk into rivers and oceans? Or is that totally ancient piece of pizza kicked back under your bed going to be fossilized into a belt buckle on some FOX Kid in the future. We humans survived the Terrible ThunderLizards, but will we survive pollution? Your task, Earth Crewer, if you decide to accept it, is to find ways to keep from polluting our soil, air and water. Because sometimes today's fun can be tomorrow's funky fossil. What are YOU leaving behind?

SCIENCE OF

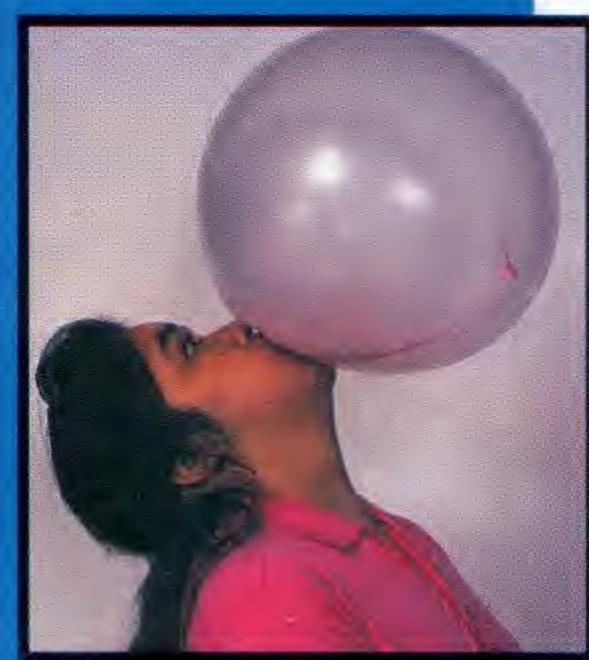

STUPID THINGS

SECRET TO BLCMP-SIZED BUBBBLE

(WITHOUT GUMMING THINGS UP)

Ever see a bubble the size of a beach ball? Susan Mont GUMery Williams, Professor of Bubble-ology and Guinness World Record holder with a whopping 22-incher, shares her secret with Totally Kids. Guess she's not afraid of a little gum-petition, eh?

Insert up to three pieces (as shown in fig. 1).

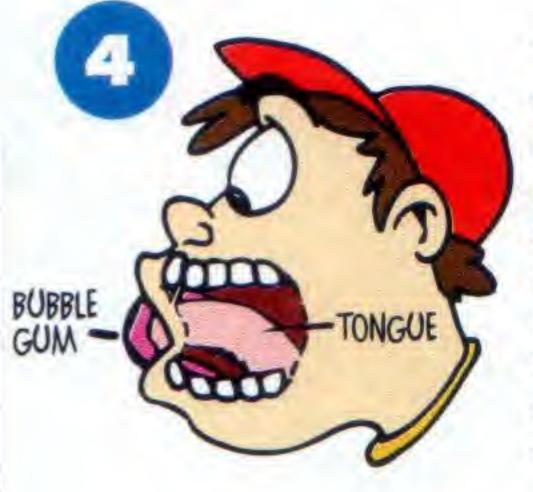

(A larger quantity is not recommended, unless you are a pelican.)

Chew thoroughly.
Approximately
1,237 times, or until
there's no flavoring
left. Sugar crystals
keep you from
blowing bigger
bubbles. (To
increase elasticity,
wash sugar out
of gum with
warm water.)

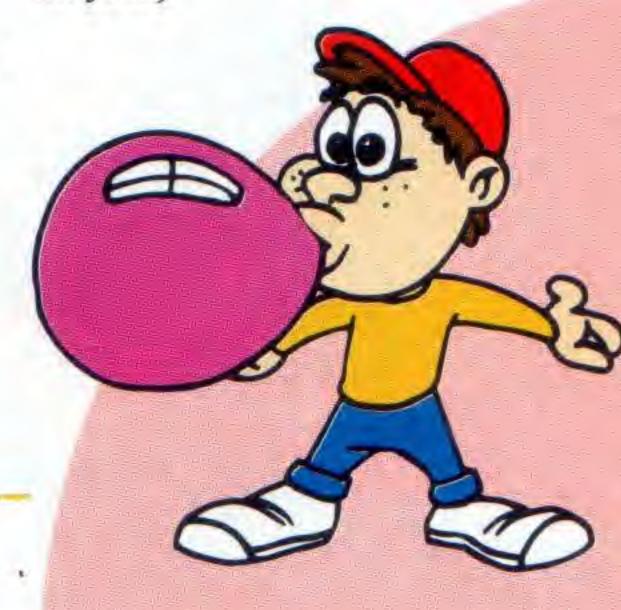

When gum becomes hard and rubbery, you're ready to place gum at the very front of your mouth (as shown in fig. 3).

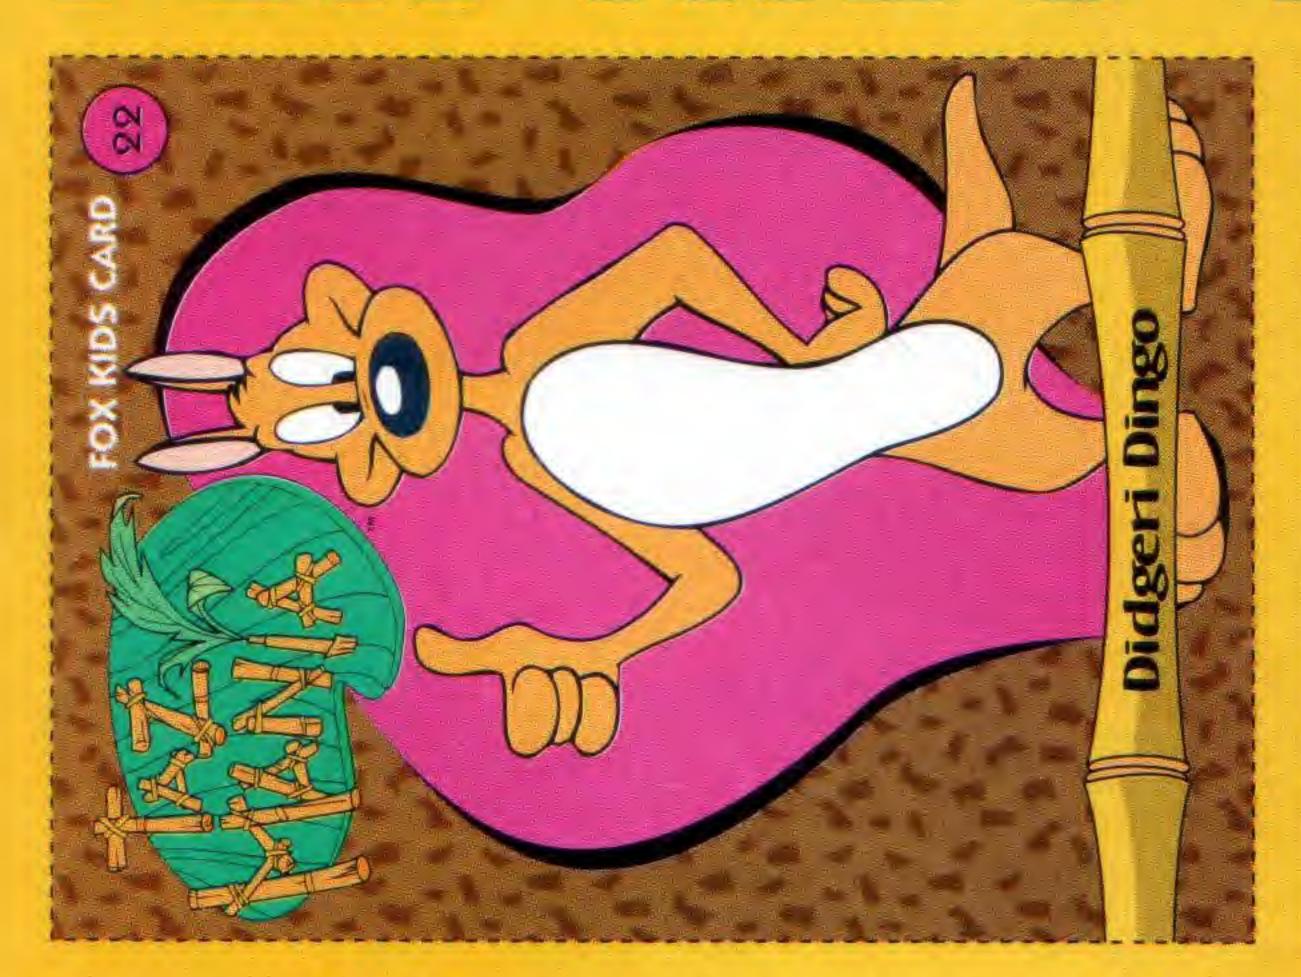

Your tongue serves a vital function at this stage: the process of pushing through the gum, to form the proper shape before applying air pressure (as shown in fig. 4).

Technically, you now have two options: inhaling and exhaling. First, inhale deeply through your nose. Then, when lungs are filled to capacity, pucker up and exhale *slowly* through your mouth. (The slower you blow the bubble, the less chance the bubble will burst back on you.)

Follow the instructions carefully, and you'll be able to blow a state-of-the-art bubble (about the size of the state of Rhode Island!). But one word of caution: While blowing your bubble, stay clear of sharp, pointy objects and overly affectionate porcupines.

ON

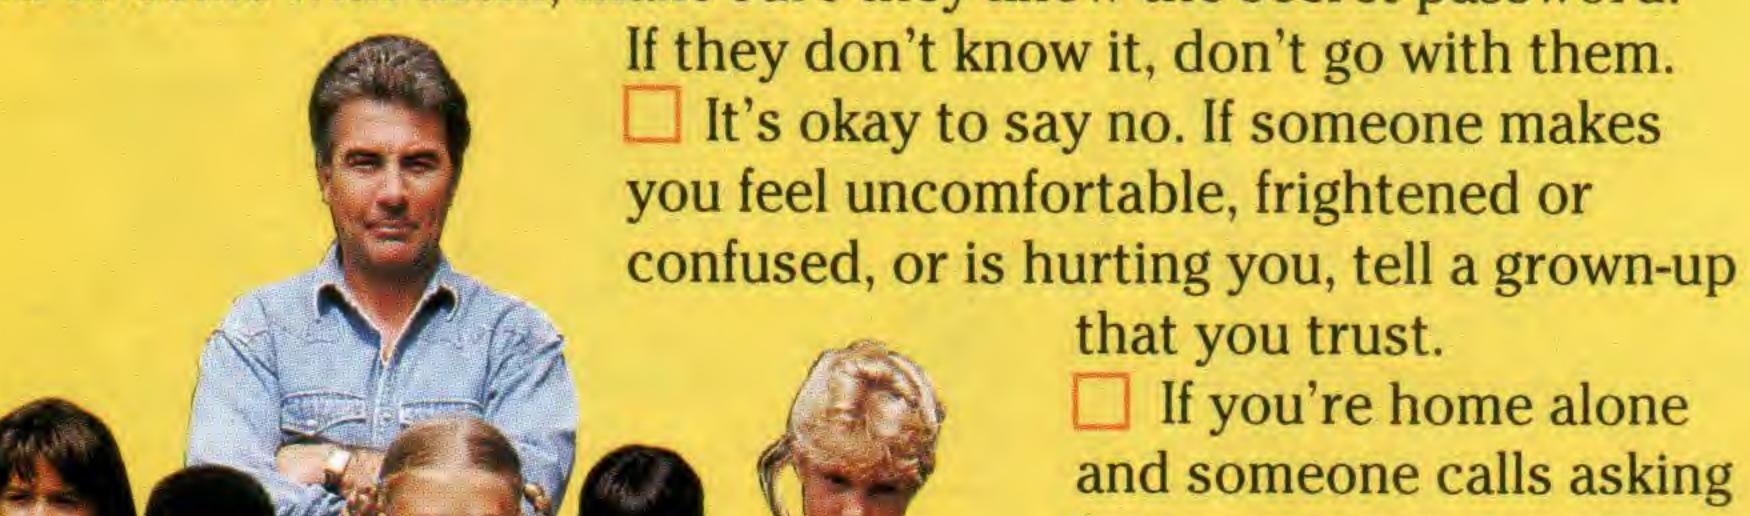

WHAT THE HECK IS A PSA?

Is it a Pink Spotted Aardvark? Plump Slimy Anchovies?
You knew all the time—it's just Pretty Smart Advice for
FOX Kids. You've seen them on T.V.—they aren't cartoons
and they aren't commercials—they're Public Service
Announcements (PSAs). Who better to give advice than reallife crime fighter John Walsh and the TOTALLY KIDS
DETECTIVE AGENCY? John has been working especially hard on kids'
safety issues. He travels to schools all across the country, and these
are the things kids most want to know.

STREET SMART CHECKLIST

- Talk to your parents. Make sure you know all the rules about safety, like what to do when you're alone in a mall, walking to and from school, etc.
- Never touch guns. If you see a gun at school, tell your teacher right away.
- Have a secret password that only you and your parents know. If someone you don't know says they know your parents and want you to come with them, make sure they know the secret password.

and someone calls asking for your parents, never say "They're not home." You're not lying if you say "They can't come to the phone right now."

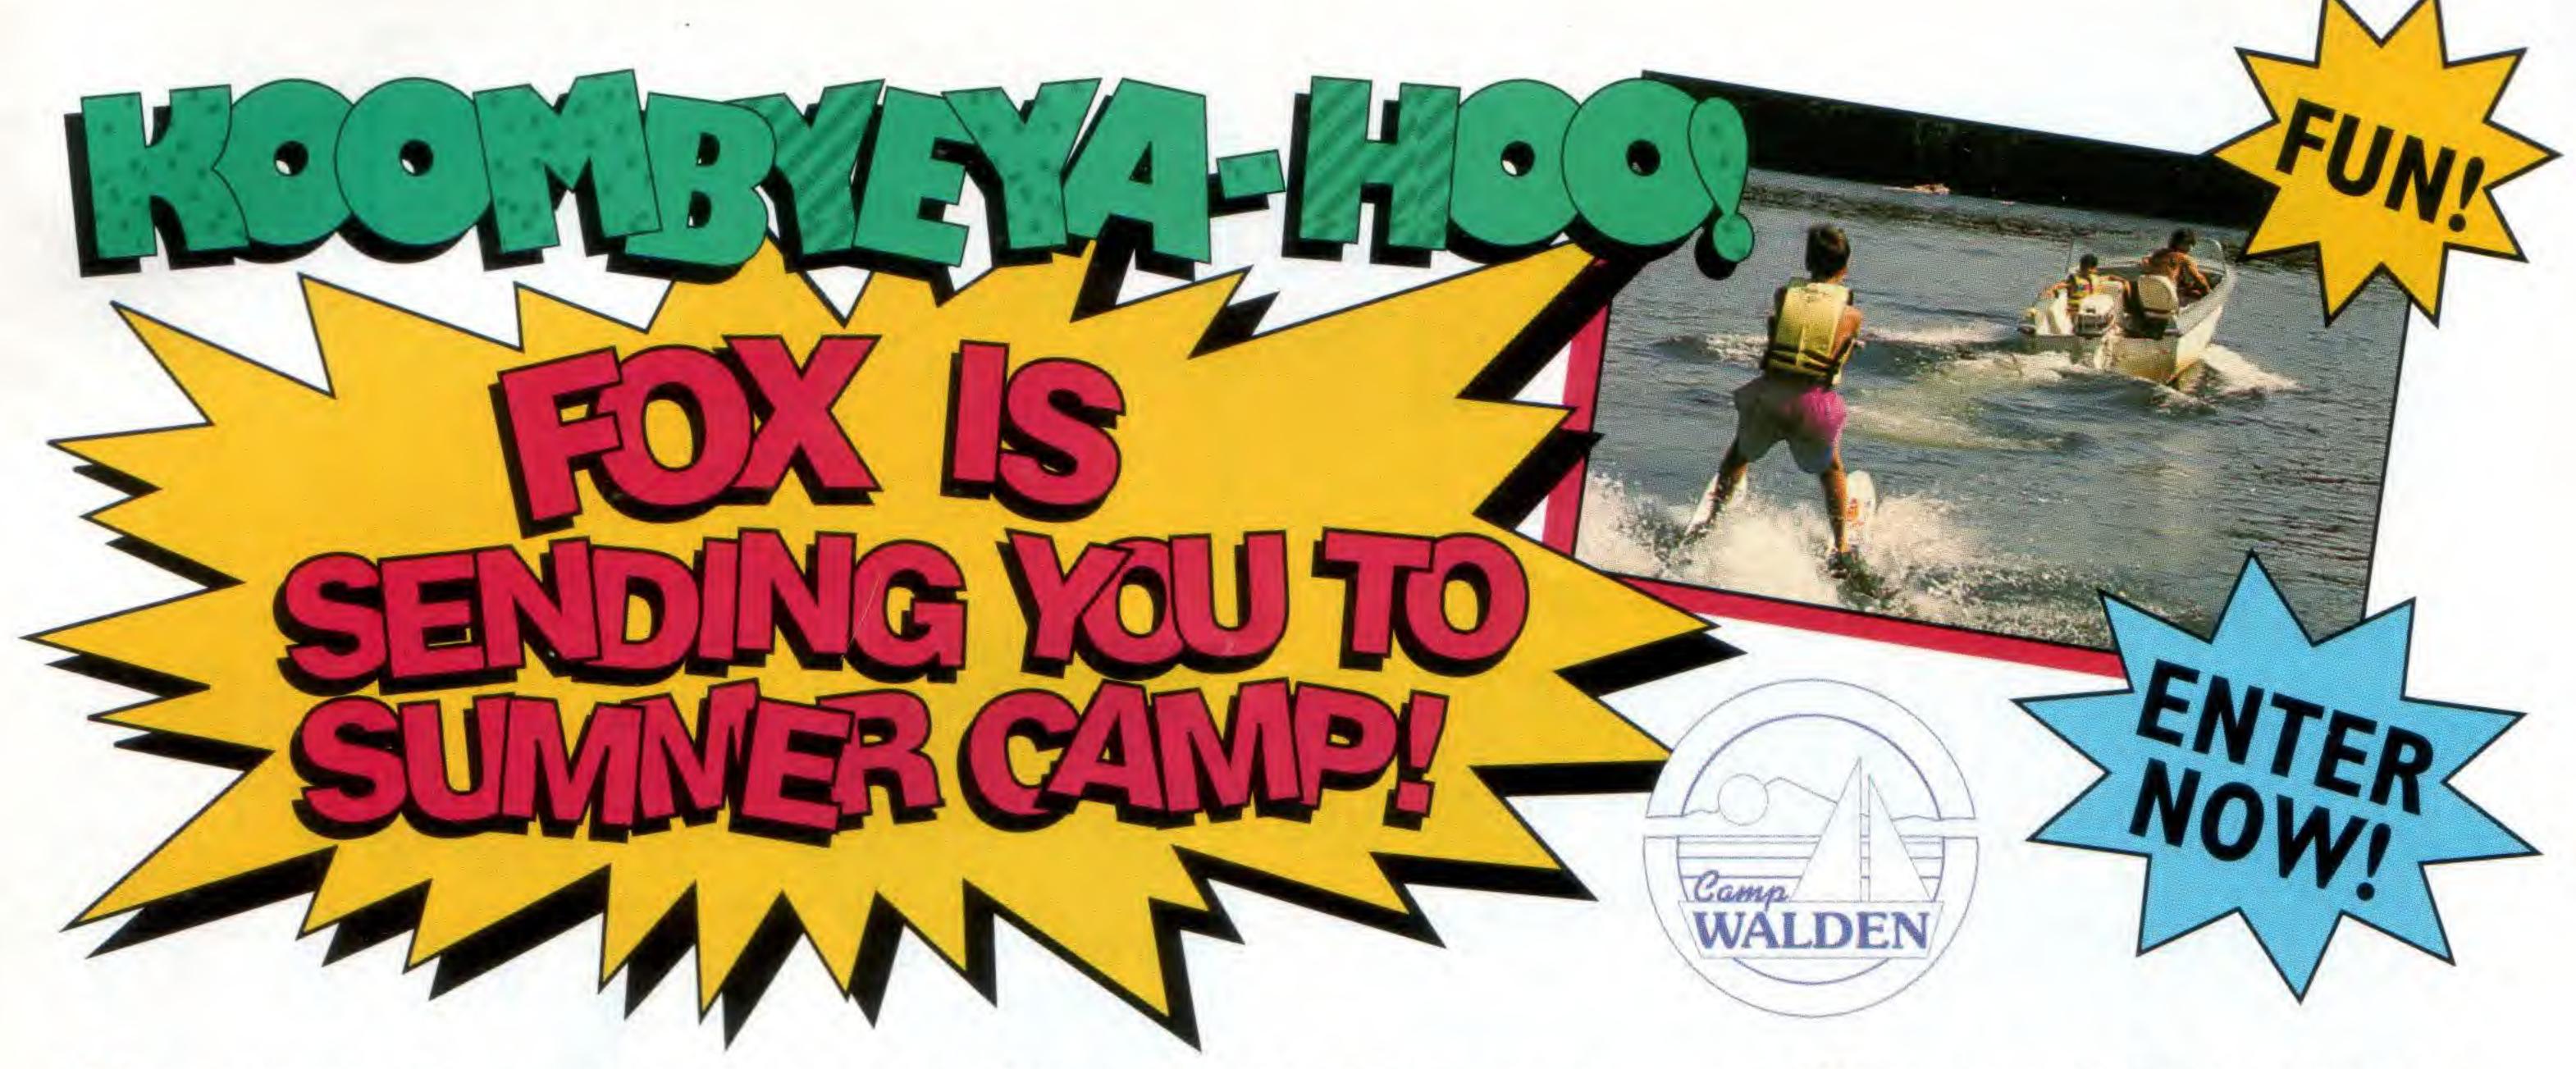

So now you've got street smarts, what do you do with them? How 'bout helping other kids? • Set up an after-school check-in program with senior citizen centers in your area. That way, when you're alone after school, you have someone to meet or call. Get your parental units, your school and local police to organize a "safe house" system where you and your buds can go if things turn weird or scary on the way to or from school. Quiz your folks about who's making laws that affect you and your crew. Let your mayor and senators know what's important in kids' safety laws. Be a part of the system, and make your questions and ideas heard. Get street smart, stay smart, and pass your smarts along.

Find 12 hidden circles in this drawing.

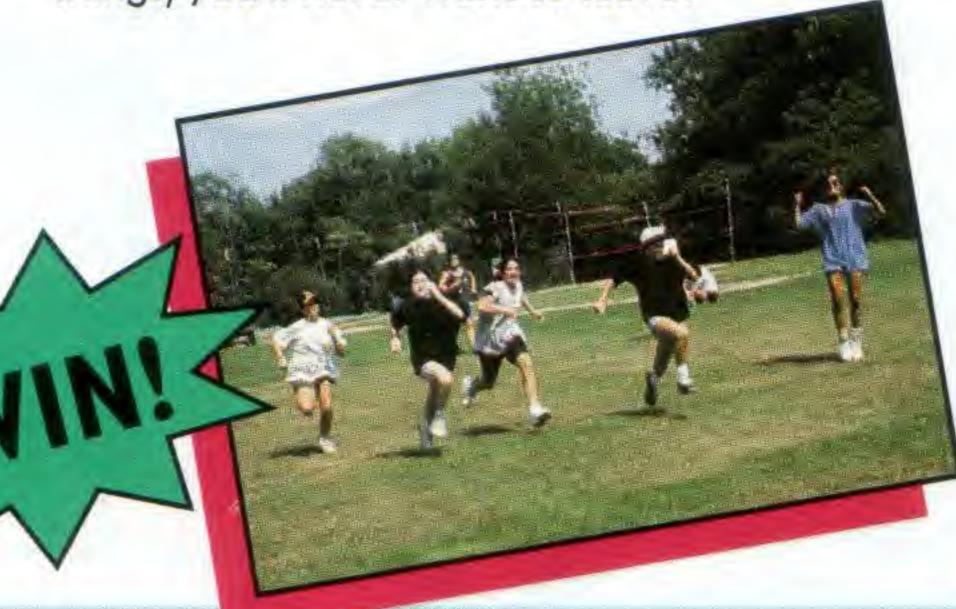

FOR MORE INFO

For more information on kids' programs involving senior citizens, call the **Family Friends Resource Center: (202) 479-6675.** For school and neighborhood safety information, call the **National Crime Prevention Council at (202) 466-6272.** For the **Center for Missing and Exploited Children** information hotline and free safety brochures, dial **1-800-THE LOST.**For a "Safe Home" start-up brochure, write to Officer Jean Green, 6240 Sylmar Ave., Van Nuys, CA 91401.

ummer's coming. That means long, drawnout days with nothing to do between your favorite FOX Kids shows. Unless, of course, you win THE FABULOUS FOX SUMMER CAMP SWEEPSTAKES! Then it means four fun-filled weeks at beautiful Camp Walden, the most awesome summer experience since ice cream! It means sports, camping, hiking, music and late-night jokes and stories around a camp fire—all from McDonald's and the FOX Kids Club. You'll be flown to Albany, New York, then whisked up to Camp Walden's 100 acres of fun! Summertime

boring? Not here! You'll have so many cool new friends and be doing so many exciting things, you'll never want to leave.

Any FOX kid age 6 to 14 can win, which means you'd better get it in gear—ENTER TODAY! Send a post card with your name, address, phone number and age to

FOX SUMMER CAMP PO BOX 230 HOLLYWOOD, CALIFORNIA 90078

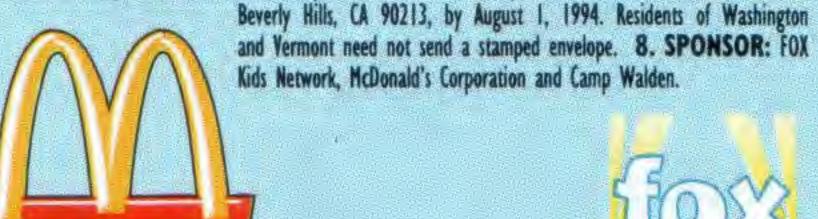

All transportation and camp fees are included. Camp Walden is a fully accredited member of the American Camping Association (1-800-428-2267). All entries must be received by March 31, 1994.

Rules that nobody really needs to know:

1. HOW TO ENTER: Legibly hand-print your full name, gender, age, address, zip code and phone on a 3-1/2" x 5-1/2" post card and mail it, postage pre-paid, to "FOX SUMMER CAMP," PO Box cards are invalid. Contest begins February 1, 1994. All post cards must be received by March 31, 1994. No mechanically reproduced post cards accepted. Sponsor (as defined below) not responsible for late, lost, unpostmarked, postage due, misdirected mail or printing errors. Post cards become the property of Sponsor and will not be returned. 2. SELECTION OF CONTEST WINNERS: From among all of the eligible post cards received, winner will be selected in a random drawing by Sponsor or its designee, during the week of April 4, 1994. Odds of winning depend on the total number of post cards received. The Grand Prize winner will be notified by telephone within 24 hours of the drawing. If Sponsor is unable to contact the Grand Prize winner by telephone within 24 hours or if winner fails to comply with any of the eligibili requirements, an alternate winner shall be selected. 3. PRIZES: There is a total of one (1) Grand Prize: A four-week stay (June 27, 1994, to July 23, 1994) at Camp Walden near Albany, NY. Trip includes round-trip coach air fare for the winner from the airport nearest the winner's home, ground transportation to and from the Albany airport and full camp privileges for the four weeks. Winner's parents or legal guardian are

responsible for winner's transportation to and from the airport of origin. Anything not provided by Camp Walden, spending money and other expenses not specified, are the responsibility of the winner. TOTAL APPROXIMATE RETAIL VALUE: \$3,200.00. 4. CONDITIONS: By entering, each entrant accepts responsibility of winner. Prizes cannot be transferred, redeemed for cash or exchanged. No substitute prizes, except another prize of similar value of its own selection, without prior notice to winner. All address changes must be submitted in writing to Sponsor. Winner must be available to attend Camp Walden during the four-week period from June 27, 1994, to July 23, 1994, or forfeit the prize. Travel arrangements will be made by Sponsor or its designee. By entering, each entrant consents to the use of his/her voice, name and likeness for broadcast transmission, advertising and promotion in connection with the contest. Sponsor makes no warranty, representation or agreement that any videotape or likeness of the winner will be broadcast or otherwise used in any manner. The winner and his/her parents or legal guardian must execute an Affidavit of Eligibility, Liability Release and Publicity Release and any other documentation that Sponsor requires. Failure to return any of the Affidavits, Releases or other required documentation within seven (7) days of receipt shall result in forfeiture of the prize and an alternative winner shall be selected. Void where prohibited by law. All federal, state and local laws apply. Sponsor accepts no responsibility or liability in connection with any injuries, losses, or damages of any kind caused by or

resulting from the acceptance, possession or usage of any prize awarded hereunder. 5. RULES: For a complete set of rules, send a stamped, self-addressed envelope to "FOX Summer Camp" Contest Rules, PO Box 900, Beverly Hills, CA 90213, until a period of one month after the contest ends. 6. ELIGIBILITY: to U.S. residents between the ages of 6 and 14 years except the employees of FOX Kids Network, McDonald's Corporation, Camp Walden and their parent companies, affiliates, subsidiaries, families or members of the same household of each. 7. WHO WON: For the name of the Grand Prize winner send a stamped, self-addressed envelope to "FOX Summer Camp" Contest Winners List, PO Box 900,

START

CARROT CAPER

What's up, Doc? Help Bugs grab some carrots and make it back home without running into Yosemite Sam. You can move up and down or right and left, but not diagonally. If you get cornered, start over and try again.

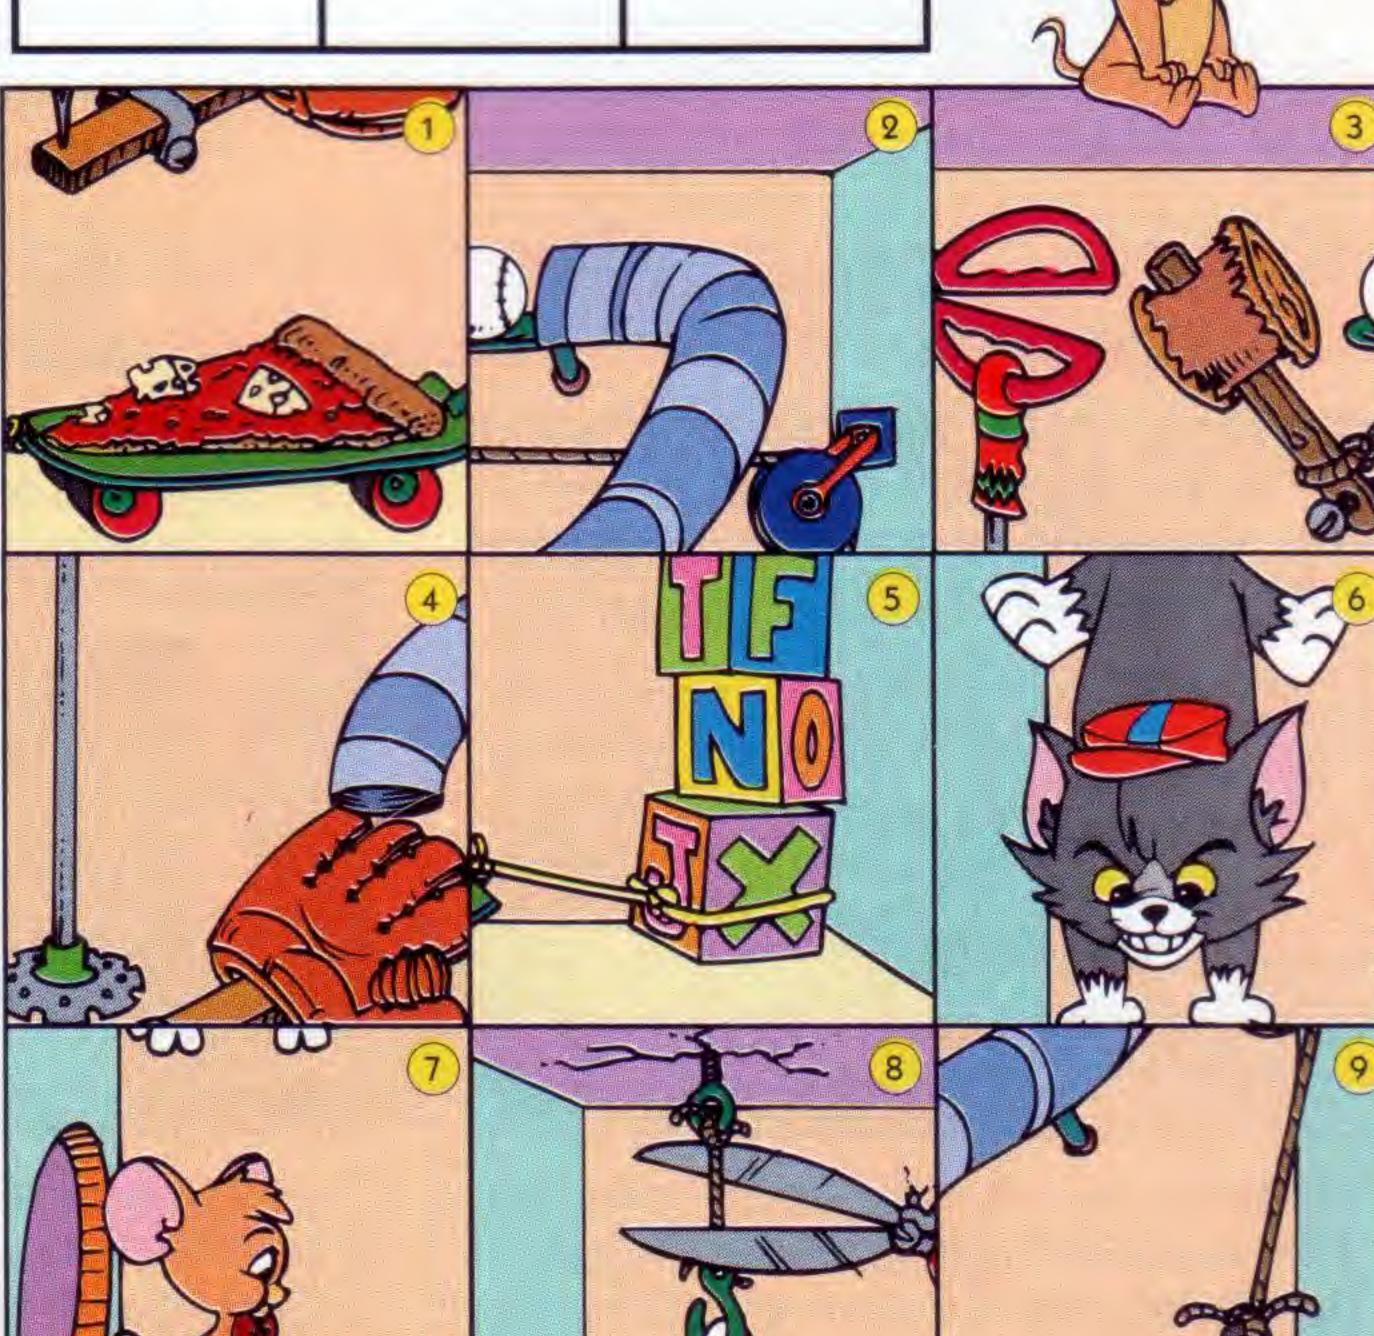

TOM'S TRAP

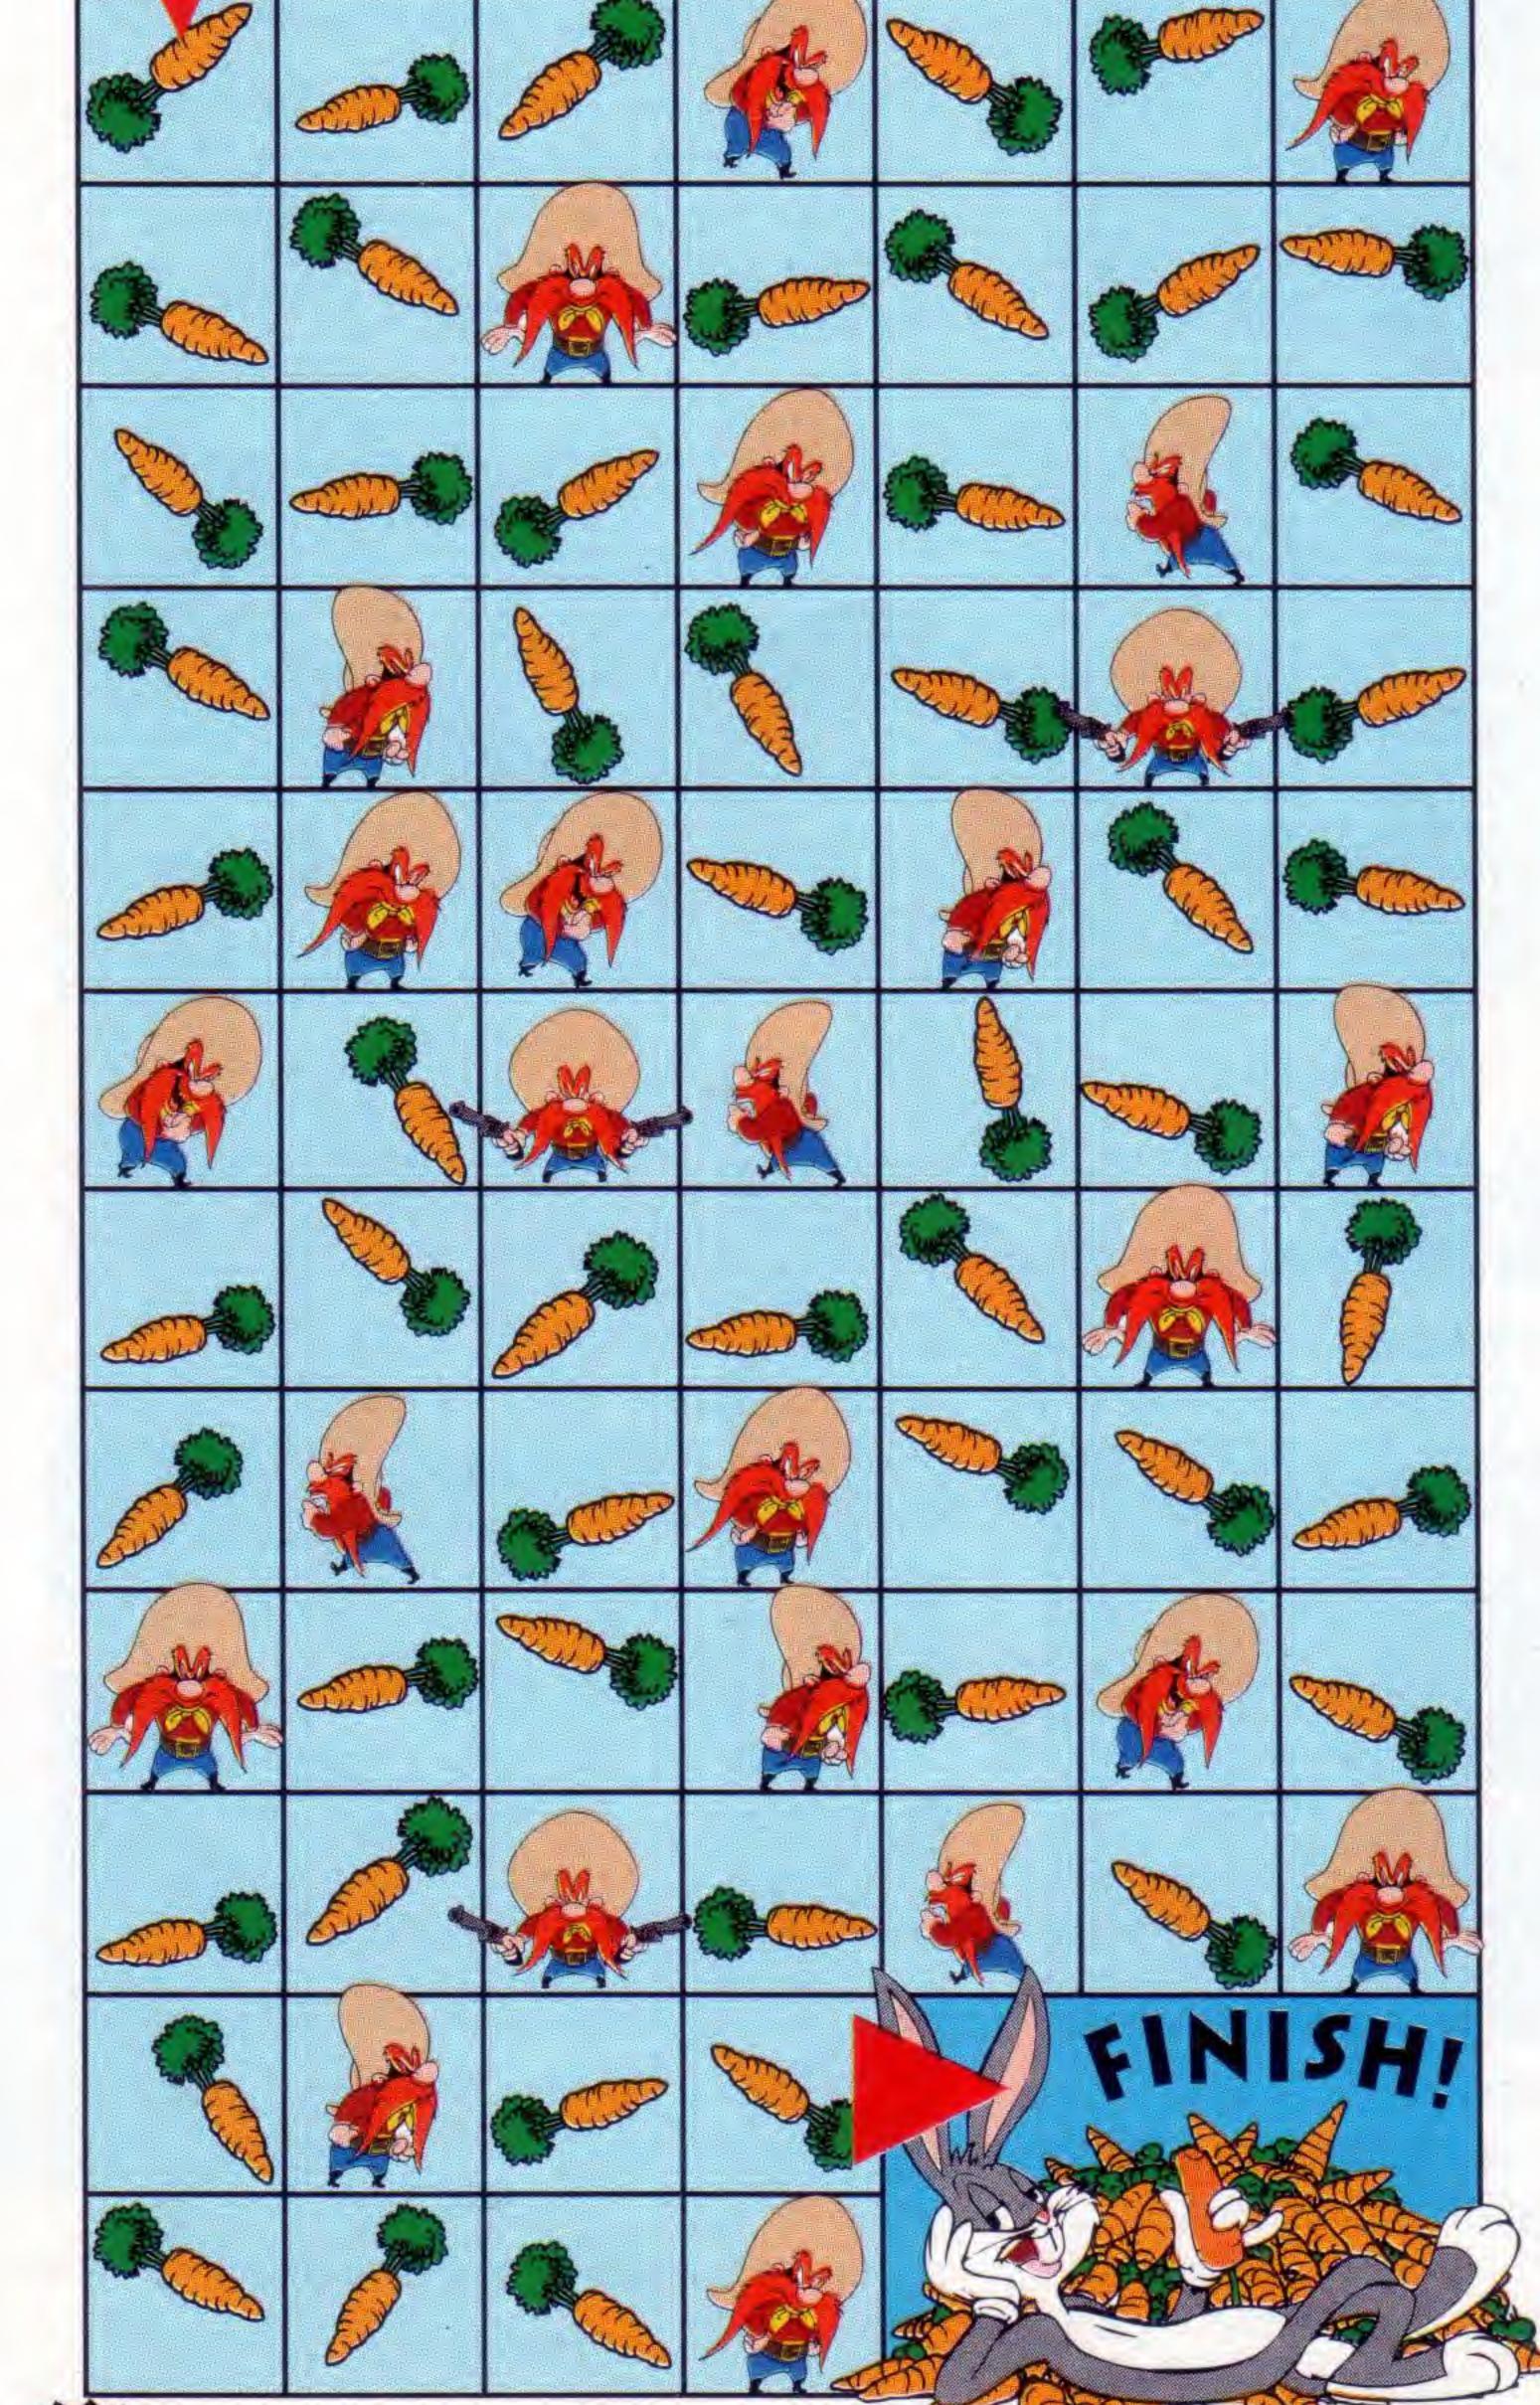

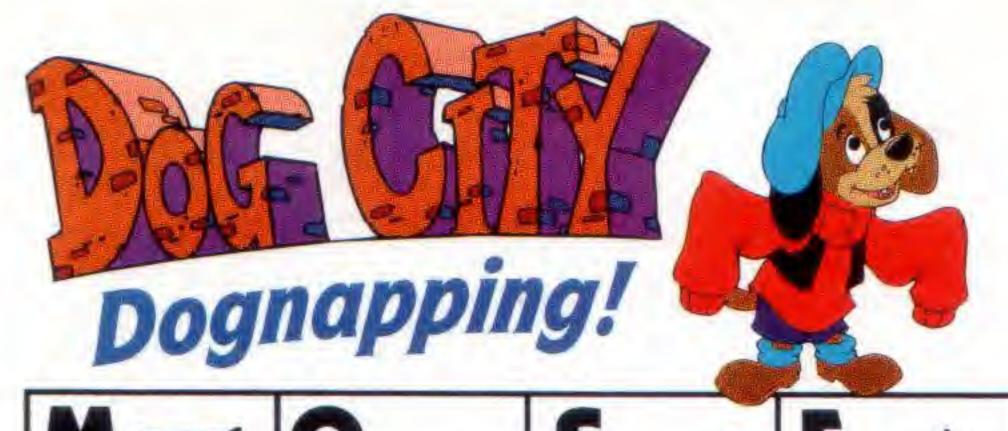

Tom built a mousetrap to catch Jerry but he got all the parts mixed up. Can you unscramble them? As you put them in order,

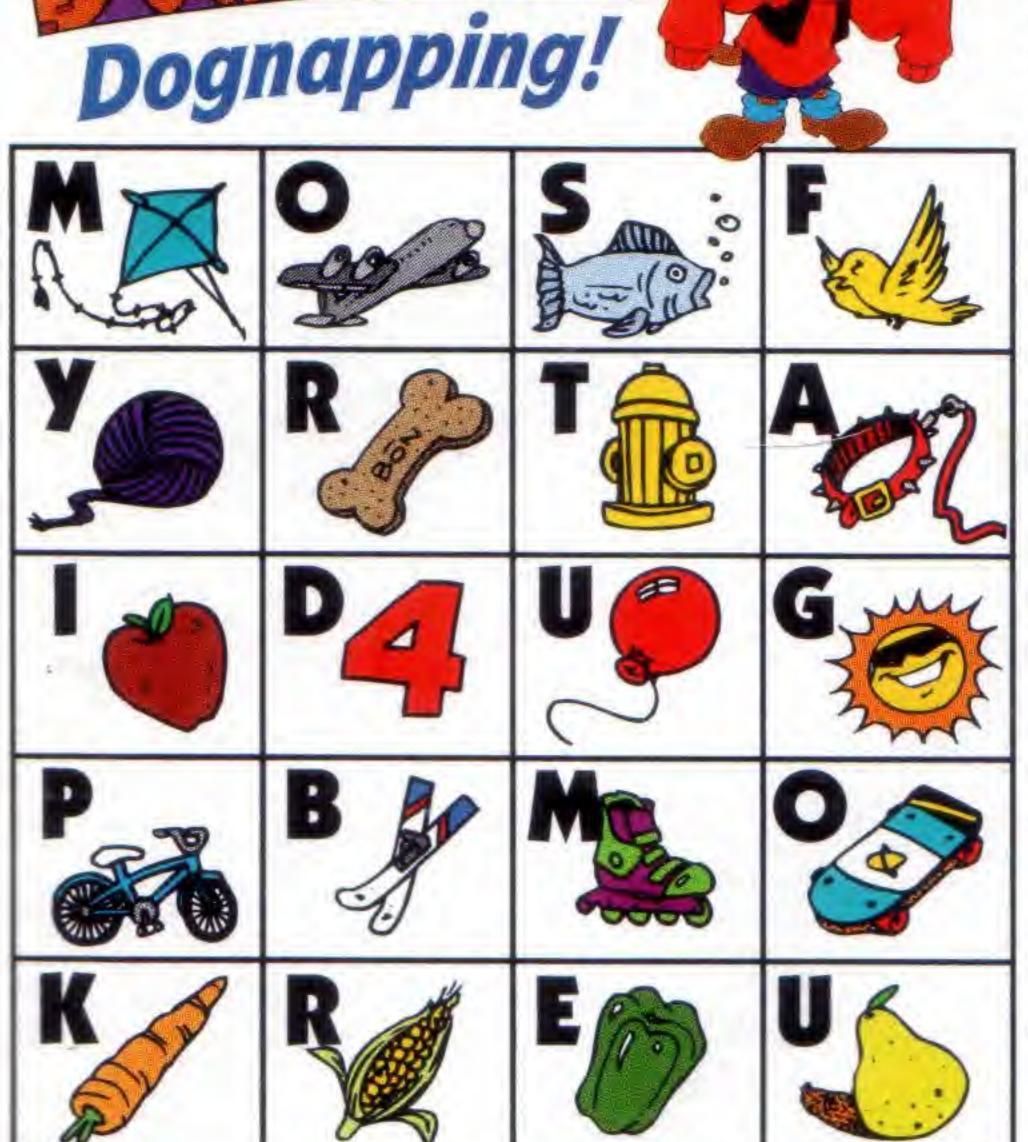

A B C
D E F
G 7 H

write the number from each part into the correct blank square to the left. We've given you G-7 to help get you started. GOOD LUCK! Answers on page 27
